DT-8806H Clinical Forehead Infrared Thermometers ensure accurate and stable body temperature readings, which is particularly efficient for taking the temperature of newborn babies and very young children. From a distance of around 5cm, all you have to do is pointing it towards the forehead to read the temperature shown on the LCD screen. Non-Contact Forehead IR Thermometer is specially designed to take the body temperature of a person regardless of room temperature. DT-8806H is portable and easy to take the measurements and store 32 readings.
