

# TOL-30aUGbCAa-U4M

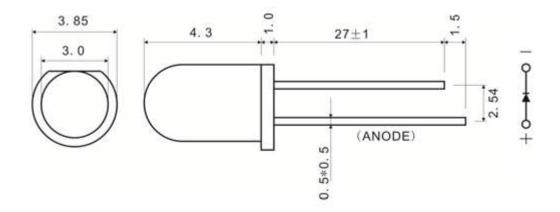

# **Lamp LED**

Part Number		Lens Color	
Fait Number	Material	Source Color	Felia Coloi
TOL-30aUGbCAa-U4M	AlGalnP	Ultra Yellow Green	Water Clear

## **Features**

- I.C. compatible.
- Low power consumption.
- Compatible with wave soldering process.
- 3.0mm diameter package.
- Long life, stable and reliable.
- · RoHS compliant.

## **Dimensions**

### Notes:

- All dimensions are in millimeter.
- Tolerance is ±0.25mm unless otherwise noted.

# Absolute Maximum Rating @ Ta=25°C

Parameter	Maximum Rating	Unit	
Power Dissipation	75	mW	
Continuous Forward Current	30	mA	
Reverse Voltage	5	V	
Operating Temperature Range	-40°C to +85°C		
Storage Temperature Range	-40°C to +100°C		
Wave Soldering Profile For Lead-free Soldering	260°C / 5 Seconds		

# Electrical / Optical Characteristic @ Ta=25°C

Parameter	Symbol	Min.	Тур.	Max.	Unit	Test Condition	
Luminous Intensity	lv	400	-	1300	mcd	I <sub>F</sub> =20mA	
Luminous Intensity		25	-	90	mcd	I <sub>F</sub> =2mA	
Viewing Angle	2θ <sub>1/2</sub>	-	20	-	deg	I <sub>F</sub> =20mA	
Dominant Wavelength	$\lambda_{\sf d}$	568	-	579	nm	I <sub>F</sub> =20mA	
Spectral Line Half-Width	Δλ	-	20	-	nm	I <sub>F</sub> =20mA	
Forward Voltage	V <sub>F</sub>	1.8	-	2.4	V	I <sub>F</sub> =20mA	
		1.7	-	2.3	V	I <sub>F</sub> =2mA	
Reverse Current	I <sub>R</sub>	-	-	10	μΑ	V <sub>R</sub> =5V

## **Cautions**

- LED bracket forming method :
  - 1. The pin of led can be bent where is at least 3mm out of led colloid.
  - 2. Must use fixture to deform the led bracket.
  - 3. Finishing the forming of led bracket must be before soldering.
  - 4. Guarantee the gap between two pin of led tallys with LED pads in PCB when forming.
- Manual soldering :

The tip temperature of soldering iron don't exceed 260°C; soldering time don't exceed 3s and soldering position must be 3mm out of led colloid.

■ Soldering temperature curve chart (figure A、figure B):

### ESD countermeasure

Static electricity and high volt can damage led. The production whose Die material is InGaN must strictly required to prevent ESD, must put on static glove and static fillet. Soldering tool and the cover of device must connect the ground, soldering condition follows the related stating of production specification manual.

### Protecting countermeasure when over current

Need add the protecting resistor in circuit in order to avoid damaging led due to big current and voltage fluctuation.

### LED installation method

- 1. Pay attention to the led polarity and avoid installation wrong. LED can't be close to euthermic component, work condition should tally with it's specification.
- 2. Don't install the LED under the condition of the led pin deformation.
- 3. The led bracket don't load any pressure when installing the led into PCB or fitting hole.
- 4. Must avoid any strike and force on led before the soldering temperature return to room temperature.

### Storage time

1. LED can be stored for a year under the condition:

the temperature of  $5^{\circ}$ C  $\sim$ 35 $^{\circ}$ C and humidity of RH60%, These production must be re-inspected and tested before use if their storage time exceed a year.

2. If LED is exposed in air for a week under the condition:

the temperature of  $5^{\circ}$ C  $\sim$ 35 $^{\circ}$ C, humidity of RH60%, must place the led in the ambience of  $65^{\circ}$ C  $\pm5^{\circ}$ C for 24 hours and use it in 15 days for best.

### Cleaning

Be careful of some chemical results in the led colloid fades and damage when using chemical clean the LED such as chloroethylene, acetone etc. can use ethanol to wash or soak LED but the time don't exceed 3 minutes.

## Kinked

The kinked tooling scrape easily the pin of LED, where the led bracket is rusting easily, especial expose it in moist air. To decrease the led bracket rust, suggest using plated tin led bracket.
