	SPECIFICATION	Model No.	CRT-591-B
		Date	2018/9/10
	Card Dispenser	Ver.	1.0
		Page	2/12

- Welcome to use Creator's products
- Please carefully read specification before using this card dispenser machine.

Main structure of CRT-591-B:

- | | |
|---|----------------------------------|
| 1-----card read component | 2----- Card dispensing component |
| 3----- Card Thickness Adjustment | 4----- Card Bezel component |
| 5----- 571 button | 6----- 591B stacker baffle |
| 7----- stacker for increase capacity of cards | |

Warning: Card issuing machine is forbidden to use above 30V voltage, if using, it will cause card issuing machine destroyed.

	SPECIFICATION	Model No.	CRT-591-B
		Date	2018/9/10
	Card Dispenser	Ver.	1.0
		Page	3/12

1、OVERVIEW

CRT-591-B is card dispenser machine with IC card reading/writing operation (Customized product mode: CRT-591-BES1)

Main features:

- ① Half length of standard card is available to be read, dispensed and captured
- ② PC/SC reading module, RS232 communication for card dispensing controlling
- ③ Multi-units communication: Support Max.8 sets
- ④ The stacker is of 400 pcs of cards capacity

2、Main function

- 1) Combination of card issuing and IC card encoding. IC card need to comply with relevant standards.
- 2) Card-Empty, Pre-card empty detection function.
- 3) Two methods of capturing cards: Error card bin and path (By removing the bars on the bottom)
- 4) Double hooks mechanism: The patented technology is compatible with dispensing and capturing cards of different lengths, and the operation is simple and convenient.
- 5) RS-232 and PC/SC dual channel control methods, Support Multi-communication via RS232 interface

3、Technical specification

Items	Parameter instructions	Explanation
Support card type	type: ISO7816 standard IC card support to dispense IC card physical characteristics : ISO7810 and 7811、ISO7811 - 2、IOS7811 - 4、ISO7811 - 5 and ISO7811 - 6 standard card dimension: ISO7810ID - 1 – IC card standard: ISO7816 standard, (AT24C01、24C02、.....、24C256; SLE4447、SLE4428; CPU T=0/T=1) etc half length card specification: Len: 42~43mm width: 53.92 ~ 54.18 mm thickness: 0.76mm±0.08mm	
Reader module	Support to read & write contacting IC card PC/SC module, able to operate SIM card (CPU card)	
Dispensing cards	1. Pushing the card out by using hook mechanism,the card is not scratched during card feeding 2. Hook supports half length standard card	
Stacker	1. Capacity is about 400pcs; 2. Support card less detection (7~15) 3. Support card empty detection 4. Removable heavy block is set in the stacker	
Card captured	1. Support to capture the card to error card bin when it is diapensed	

	SPECIFICATION	Model No.	CRT-591-B
		Date	2018/9/10
	Card Dispenser	Ver.	1.0
		Page	4/12

	2. Support the structure of the error card bin, the error card bin without the lock structure is able to be drawn out from the side of the card machine, its capacity ≥ 10 flat cards	
Bezel	1. With Bezel	
Reset	1. Support power on reset function (initialization) 2. Software reset function (initialization)	
Command	1. Support the card moving commands 2. Support the card captured commands 3. Software supports dynamic identification standard length card or half length card in stacker, USB read card method (support PC/SC)	
Life time	1. Transportation: 100,000times 2. IC card contact pin: 300,000times, error rate < 1000 times	
Interface	1. Support multi-communication RS232 3PIN 2. Power input (4PIN) 3. Support firmware upgrading 4. Support DLL for customers	
Voltage and current	1. DC 24V $\pm 5\%$ 2. Idle current $\leq 0.2A$, peak current $\leq 2A$	
Certification	1. Certified EMC/CE (GB9254、GB/T17618、GB/T17626 standard requirement) 2. ROHS 3. Certified EMV L1	
System	1. Support windowXP, window7、8	
Environment conditions	1. operation 0°C ~ 50°C 2. storage -25°C ~ 70°C 3. operation humidity 5% ~ 90% (non condensing)	
dimension	Max size L*W*H (257mm*100mm*397mm)	
Spare parts	Provide cables for power supply and PC communication	

4、Accessory Description

1) standard spare parts:

Name	BOM	Qty	Remark
591B heavy block	0591-0G971	1	
4PIN power cable	L14-333-153	1	4PIN、length 1.5m
RS232 communication	L10-006-163	1	3PIN、length 1.6m

	SPECIFICATION	Model No.	CRT-591-B

		Page	7/12

7、 The card stop position drawing:

8、 DIP Setting Of Unit Address

Through the 4-digit DIP switch on the main board, 1 to 3 can be used to set the address of each extension : (See table 1 below)

Dip switch	1	ON	OFF	ON	OFF	ON	OFF	ON	OFF
	2	ON	ON	OFF	OFF	ON	ON	OFF	OFF
	3	ON	ON	ON	ON	OFF	OFF	OFF	OFF
Address	00	01	02	03	04	05	06	07

9、Notice

1) IC card position in stacker

The position of chip

2) Iron block position in stacker

The block placement position

- 2) When using, please kindly note that card thickness have been fixed, don't adjust it.
- 3) After placing card into stacker, make sure iron block on cards

	SPECIFICATION	Model No.	CRT-591-B
		Date	2018/9/10
	Card Dispenser	Ver.	1.0
		Page	9/12

2 in 1 card dispenser adjustment

1. Accept half-size card

2. Put iron on the card

3. Extend the shifting board

4. Ready to dispense full-size card

	SPECIFICATION	Model No.	CRT-591-B
		Date	2018/9/10
	Card Dispenser	Ver.	1.0
		Page	10/12

5.Put full-size card on the stacker

6.Put iron on the stacker

10、Maintenance

After a long time usage, factors such as the machine's transportation mechanism wear and tear, dust on sensor, magnetic head, IC card contact will influence the performance of the machine, and hence it should be maintained on a constant basis.

Detail maintenance instruction is as following:

- ① Use a cleaning card or a cloth with alcohol to clean the card dispensing mechanism and card read/write mechanism. (To open the card read/write components please refer to chapter 12"Caution")
- ② Pick out greasy card and deformed card, and clean the greasy card with soft cloth tapped cleaning alcohol. If the deformed card is unable to restore, it is necessary to replace this deformed card with normal one.
- ③ Keep card pre-empty sensor clean by soft cloth with cleaning alcohol.
- ④ Sensor maintenance: Use the sensor status inquiry command to examine sensors' status. When the reader is running under good condition, all its 10 sensor groups' status are 'OFF'; If any sensor group's status is 'ON', it is possible to be covered by dust; You can try to clean the sensor, especially this sensor group.
- ⑤ IC card contact maintenance: Clean the IC card contact if there is any dirty on them.
- ⑥ Transportation roll maintenance: Transportation roll should be check regularly and clean by cleaning alcohol if there is any dirty.

		Page	11/12

11、Cautions

- 1) Before maintenances, make sure the power connection is cut off in order to avoid machine damage.
- 2) Pay attention to DIP specification, wrong DIP number will bring about no work and unknown status.
- 3) Prohibit warm plug in and out of connector. Warm plug will cause circuit damage.
- 4) Keep machine non-greasy, oily cohesive will deadly influence the performance of machine.
- 5) Pay attention to the IC card direction in stack.
- 6) Pay attention to the power off sequence, cut off power first and then cut off communication cable.
- 7) To open/close the card read/write component
 - ① Open the cover of read/write component: Push the button on the both side of machine (See picture). And make sure the button is push to the end.
 - ② Pull up the cover of read/write component and clean the rubber wheel, photoelectric sensor and IC card contact.
 - ③ Restore the cover of read/write component: Push the button on the both side of machine (See picture4) and pull down the cover to original place and loose your hand. Make sure the cover is in the correct place.

Picture4. To open RF/IC card component

- 8) Trouble shooting
Once the card dispenser has an error such as blocking, you must use the reset command to clear the error flag before executing other commands.
