

LT-RF38

MFR: LAFVIN

Specification:

Frequency	2400~2500MHz
Type	Internal Antenna
Product	Antenna
Gain	3.2dBi
Technology	Wi-Fi
Radiation	Omnidirectional

Enhance your Wi-Fi connectivity with this compact 2.4GHz internal mount antenna. Featuring a 3.2dBi gain, this antenna is ideal for improving signal strength and quality in various wireless applications.

Key Features:

- *Frequency Range:* Optimized for 2.4GHz Wi-Fi networks, ensuring compatibility with a wide range of devices and routers.
- *Gain:* 3.2dBi gain enhances signal strength, providing better coverage and reliability in both indoor and outdoor settings.
- *Compact Design:* The small form factor allows for easy installation in space-constrained environments, such as laptops, IoT devices, and routers.
- *Cable:* Comes with a 10cm long 1.13mm cable, offering flexibility for internal mounting and minimizing signal loss.
- *Connector:* Equipped with a UFL connector for straightforward integration with compatible devices.

Applications:

- *Wireless routers and access points*
- *Wi-Fi-enabled devices and modules*
- *IoT and smart home applications*
- *Laptop and portable devices*

Installation Tips:

- *Position the antenna away from metal surfaces to avoid interference.*
- *Ensure a secure connection to maintain optimal signal quality.*
- *Route the cable carefully to prevent kinks or tight bends.*
