| Configuration  |  |
| Connection type                                      | Single contact   |
| Description of HIA trip-indicating auxiliary contact | General trip indication '+', when tripped by shunt release, overload release, short-<br>circuit release or by the residual-current release due to residual-current.<br>Can be used with NZM1, 2, 3 circuit-breaker: a trip-indicating auxiliary contact can<br>be clipped into the circuit-breaker.<br>Can be used with NZM4 circuit-breaker: up to two standard auxiliary contacts can<br>be clipped into the circuit-breaker.<br>Any combinations of the auxiliary contact types are possible.<br>Not in combination with switch-disconnector PN<br>Marking on switch: HIA<br>Labeling in FI-Block: HIAFI.<br>If the trip-indicating auxiliary switch in the fault current block is used, the NC<br>contacts operates as a N/O contact and the NC contact operates as an N/O<br>contact. |
| Description standard auxiliary contact HIN           | Switching with the main contacts Used for indicating and interlocking tasks.<br>Can be used with NZM1 circuit-breaker: a standard auxiliary contact can be<br>clipped into the circuit-breaker.<br>Can be used with NZM2 size circuit-breaker: a standard auxiliary contact can be<br>clipped into the circuit-breaker.<br>Can be used with NZM3, 4 circuit-breaker: up to three standard auxiliary contacts<br>can be clipped into the circuit-breaker.<br>Any combinations of the auxiliary contact types are possible.<br>Marking on switch: HIN.<br>On combination with remote operator NZM-XR the right mounting location of<br>standard auxiliary contact HIN can be fitted only with individual contacts.   |
| Connection technique                                 | Screw terminals  |

#### Notes

The following can be clipped into the switches:

- NZM1: a standard auxiliary contact
  NZM2: up to two M22-(C)K... standard auxiliary contacts
  NZM3: up to three M22-(C)K... standard auxiliary contacts
- NZM4: up to three M22-(C)K... standard auxiliary contacts

Any combinations of the auxiliary contact types are possible.

Marking on switch: HIN

In combination with remote operator NZM-XR... only single contacts can be fitted to some installation locations of the standard auxiliary contact.

NZM2: Only single contact can be fitted in left installation location of standard auxiliary contact.

NZM3: Only single contact can be fitted in installation locations of standard auxiliary contact.

NZM4: Only single contact can be fitted in right installation location of standard auxiliary contact.

Low-voltage industrial components (EG000017) / Auxiliary contact block (EC000041)

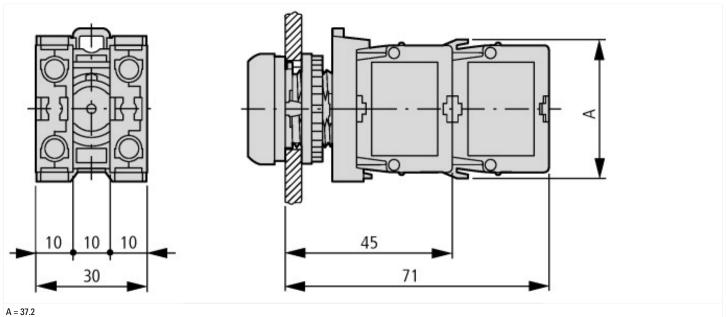

Electric engineering, automation, process control engineering / Low-voltage switch technology / Component for low-voltage switching technology / Auxiliary switch block (ecl@ss10.0.1-27-37-13-02 [AKN342013])

| Number of contacts as change-over contact     |   | 0                           |
|---|---|-----------------------------|
| Number of contacts as normally open contact   |   | 0                           |
| Number of contacts as normally closed contact |   | 1                           |
| Number of fault-signal switches               |   | 0                           |
| Rated operation current le at AC-15, 230 V    | A | 6                           |
| Type of electric connection                   |   | Screw connection            |
| Model   |   | Top mounting and integrable |
| Mounting method                               |   | Front fastening             |
| Lamp holder                                   |   | None                        |

# Approvals
