

Automation for a Changing World

Delta High Performance / Standard Compact Drive MH300 Series / MS300 Series

DELTA
Smarter. Greener. Together.

Compact and Intelligent the new standard for Micro drives

The automation industry today continues to face challenges such as increasing competition and rising costs. In addition to improving productivity and reducing labor, the driving force for automation is shifting to higher efficiency, optimal quality, and most importantly, flexibility and compatibility for a wide range of applications.

Delta's MH300 and MS300 series are a new generation high performance and standard compact vector control drives that inherit Delta's superior drive technology—all in a compact drive that reduced 40% in size.

A variety of essential functions are built-in as standard, including: PLC capacity for simple programming needs, a communication slot for various communication cards, and a USB port to make data uploads and downloads fast and easy. This saves the need for additional hardware, while providing more installation space for the power cabinet.

Other key features include: Support for both IM and PM motor control for application flexibility, an STO function to ensure worry-free operation while protecting facilities from damage, and a simplified wiring process with a new screwless wiring design of terminal blocks for quick installation.

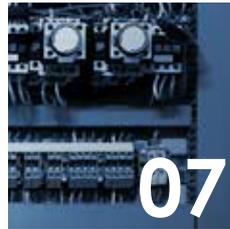

Saving space, reducing setup and wiring time, and providing high efficiency and stability system, the MH300 and MS300 are your key to improving market competitiveness and ensuring success.

Models Overview

Standard Models
High Speed Models
Exterior Design and Interfaces
Optional Cards

Optimized Space Utilization

Compact Design
Side-by-Side Installation

Outstanding Drive Performance

Support IM and PM Motors
High Starting Torque
Enhanced Braking Capability
Fast Response to Load Changes
Deceleration Energy Backup (DEB)

Strong System Support

Multi-motor Control
Pulse Control
Built-in PLC
High Speed Applications
24 VDC Power Supply
High Overload Capability
Built-in Brake Chopper
Closed Loop Control
Supports Various Communications

Stable, Safe and Reliable

Safety Standards Compliance
Enhanced Conformal Coating
Built-in EMC Filter
IP40 Models

Easy to Install

Application Parameter Settings
Built-in USB port
Screwless Wiring of Control Terminal

Wide Range of Applications

Machine Tools
Woodworking Machines
Automatic Tool Changers (ATC)
Water Pumps
Packaging Machines
Textile Machines

Models Overview

Hardware Design

Compact design and user-friendly interface

Removable Keypad

Press to remove; for remote operation away from drive

Built-in USB Port

Easy and fast programming setting, update and real-time monitoring and tuning

Specified Product Label

Input/output current, voltage and protection rating

Screwless Top Cover Design

Simply press on the left and right hand sides to remove the top cover for wiring

Removable Fan

Easy to replace and maintain for a longer lifetime

MH300 Series

5 digits 16 segments LCD display, quick setting wheel dial, left-shift function key

MS300 Series

5 digits 7 segments LED display, frequency knob, Up and Left/Down function keys

Removable RFI Jumper

Applicable for different application needs

Option Cards

A wide selection of option cards for highly flexible applications

PG Cards (for MH300)

<p>ABZ Signal Line driver</p> 	<p>ABZ Signal Open collector</p> 
<p>Resolver PM motors</p> 	

I/O Cards (for MH300)

<p>I/O</p> 	<p>Analog</p> 
--	---

Relay Cards (for MH300)

<p>Form A ×3</p> 	<p>Form C ×2</p> 
--	--

External Power Supply Card (DC 24V)

Communication Cards

<p>CANopen*</p> 	<p>DeviceNet</p> 
<p>* For MS300 only</p>	
<p>PROFIBUS DP</p> 	<p>EtherNet/IP</p> 
<p>MODBUS TCP</p> 	<p>EtherCAT*</p> 
<p>* For MH300 only</p>	

Optimized Space Utilization

Compact Design

The MH300 and MS300 Series feature powerful functions but come in smaller sizes.

Compared with current models, the MH300 and MS300 Series feature up to a 40% size reduction to effectively optimize installation spaces.

Side-by-Side Installation

Supports side-by-side installation with operating temperatures of $-20^{\circ}\text{C} \sim 40^{\circ}\text{C}$. Enables highly flexible and highly efficient installation.

Substantial savings in space!

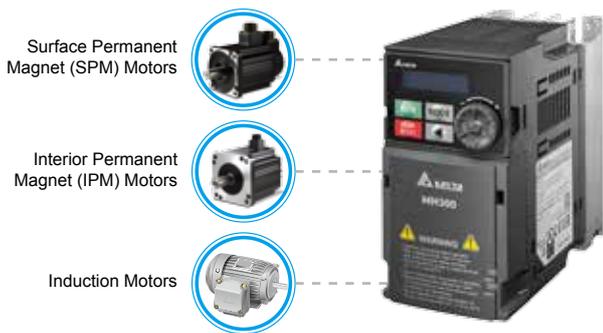

Outstanding Drive Performance

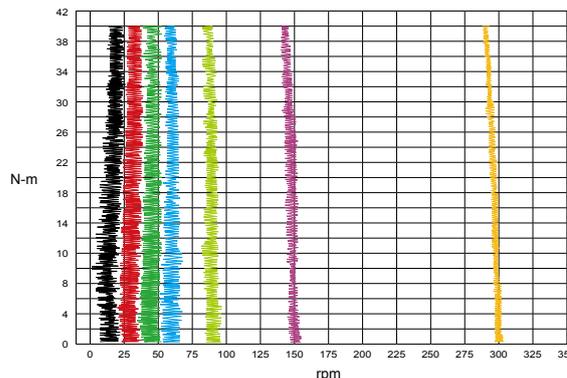

Supports IM and PM Motors

The MH300 and MS300 Series both feature 4 independent induction motor control parameters. The MH300 Series can support up to 8 independent induction motor control parameters.

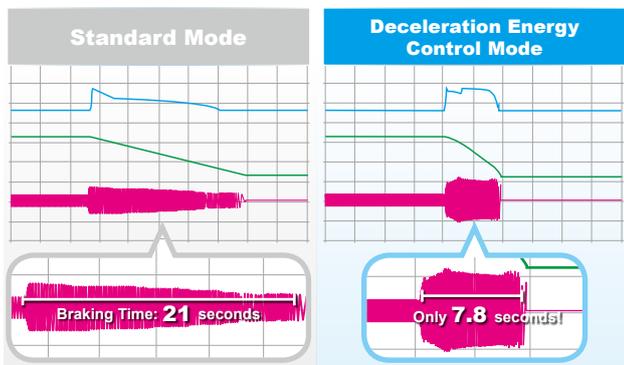

High Starting Torque

Delivers 200% high starting torque with a low speed control of 0.5Hz. This feature provides outstanding machine stability and is suitable for dynamic loading applications.

Enhanced Braking Capability

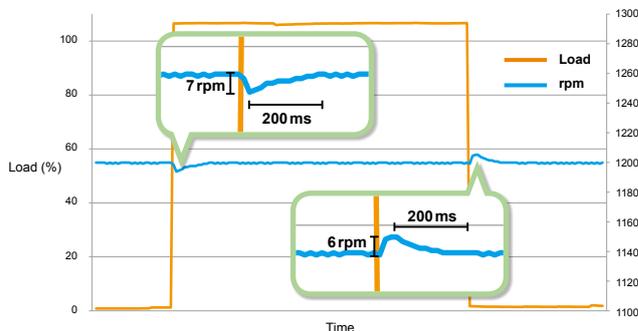

Set up the deceleration energy control mode to shorten braking time by adjusting the motor speed and current. This feature also delivers savings from braking resistors.

* Actual deceleration performance would depend on different system loads

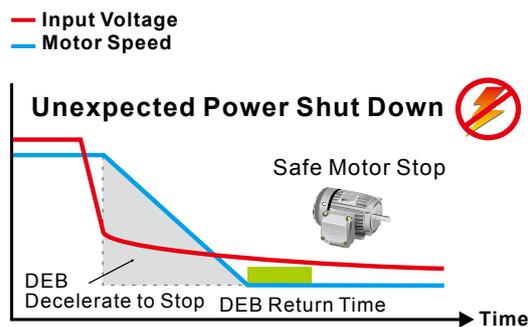

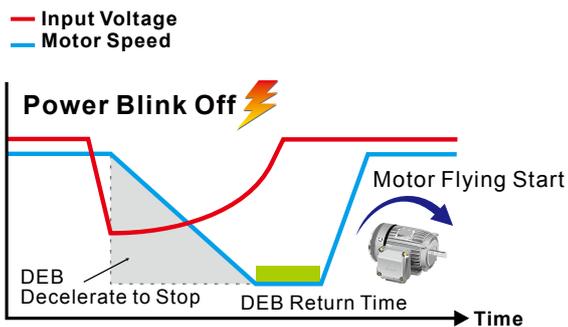

Fast Response to Load Impact

Fast response to sudden load impact on speeds to ensure stable production and high quality output.

Deceleration Energy Backup (DEB)

Controls the motor's deceleration to a stop when a sudden power outage occurs and accelerates it to its previous speed when power returns.

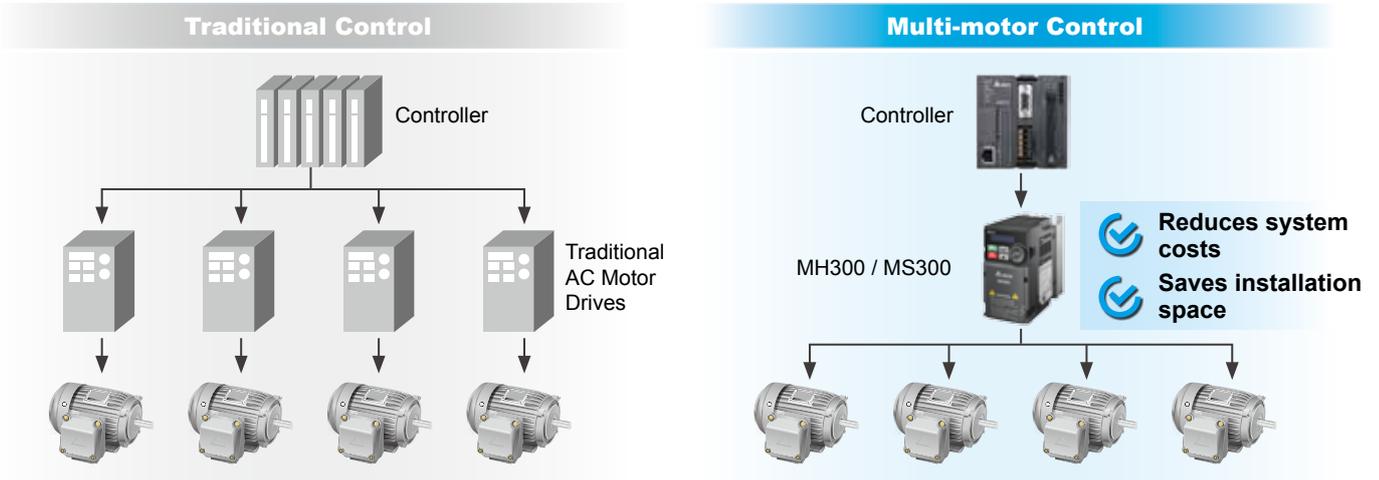

Strong System Support

Multi-motor Control

MH300 Series supports 8 induction motors switching control.

MS300 Series supports 4 induction motors switching control.

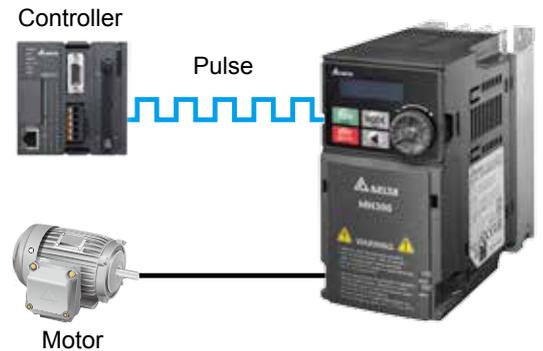

Pulse Input

MH300

Supports dual pulse input signal from controller or feedback signal from encoder without additional PG card; achieves simple closed-loop control.

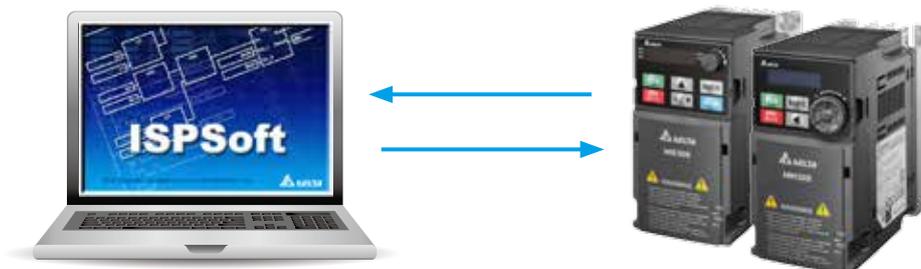

MS300

Supports single pulse input signal from controller.

Built-in PLC

MH300 built-in PLC capacity (5K steps) and MS300 built-in PLC capacity (2K steps); to provide distributed control and independent operation via network connection.

High-Speed Applications

High-speed models are available in both MH300 and MS300 series to support high-speed processing.

MH300

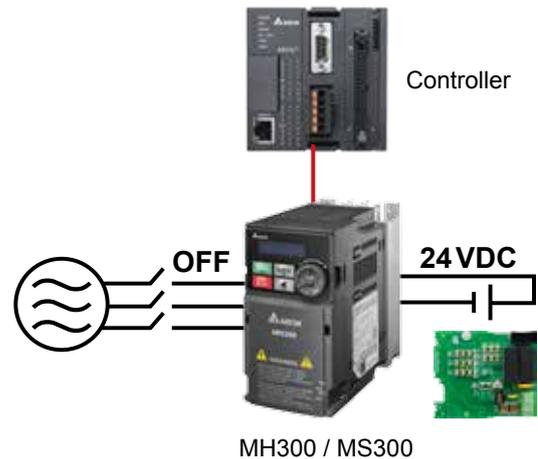

Type	Model	Frequency Setting
Standard	VFD □□□ MH □□□□ SAA	0~599Hz
High-speed	VFD □□□ MH □□□□ SHA	0~2000Hz

MS300

Type	Model	Frequency Setting
Standard	VFD □□□ MS □□□□ SAA	0~599Hz
High-speed	VFD □□□ MS □□□□ SHA	0~1500Hz

DC 24V External Power

External power supply is available when main power failure occurs to ensure uninterrupted communication and to protect the system.

High Overload Capability

- Normal duty: rated current 120% for 60 seconds; 150% for 3 seconds.
- Heavy duty: rated current 150% for 60 seconds; 200% for 3 seconds.

Built-in Braking Chopper

Larger braking torque capability is provided when use with an additional braking resistor.

Closed-Loop Control

Optional PG card is available for MH300 to support closed-loop control function and providing higher precision of motor speed control.

Versatile Communication Interfaces

- MH300, built-in RS-485 (MODBUS) and CANopen.
- MS300, built-in RS-485 (MODBUS).

More communication cards are available upon selection:

Communication	MH300	MS300
MODBUS	Built-in	Built-in
PROFIBUS DP	Optional	Optional
DeviceNet	Optional	Optional
MODBUS TCP	Optional	Optional
EtherNet/IP	Optional	Optional
CANopen	Built-in	Optional
EtherCAT	Optional	(To be announced)

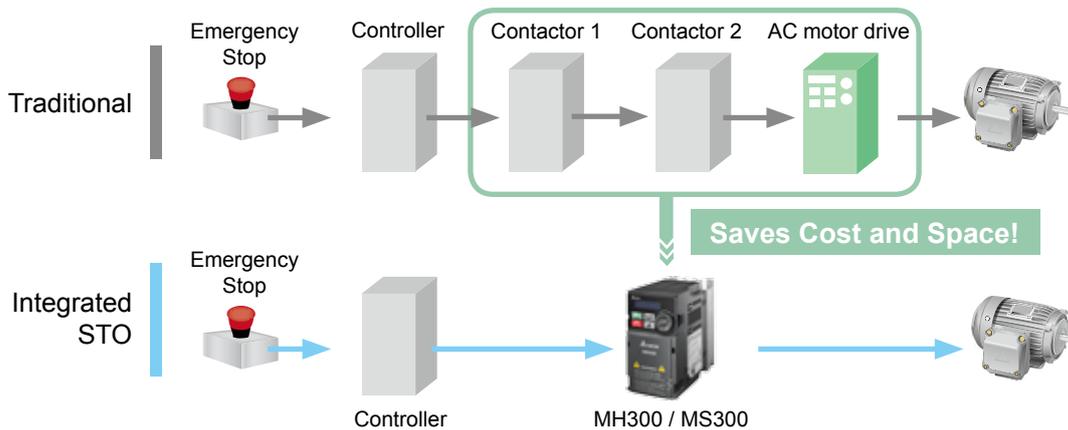

Stable, Safe and Reliable

Safety Standard

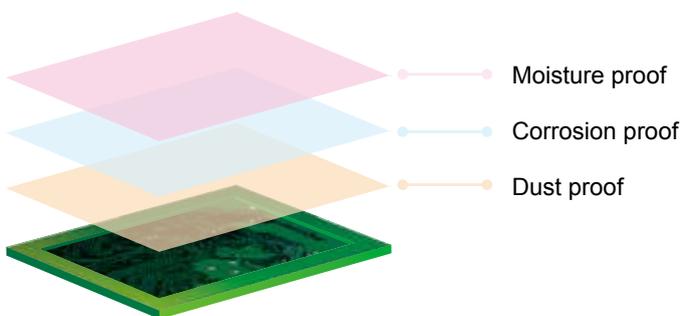

Integrated Safe Torque Off (STO), compliance with:

- ▶ EN ISO 13849-1 Cat3/PLd
- ▶ EN 61508 SIL2
- ▶ EN 60204-1 Category 0
- ▶ EN 62061 SIL CL 2

PCB Coating

100% PCB coating (IEC 60721-3-3 class 3C2 standard) ensures drive operation stability and safety in critical environments.

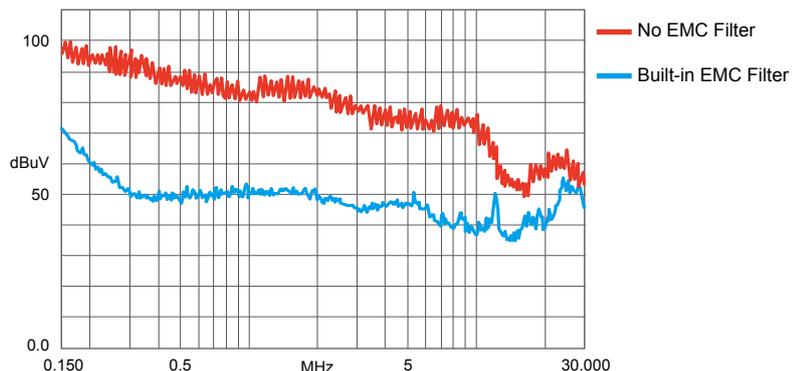

IP 40 Models

Strengthened fan coating and concealed air vent prevent dust and other particles from entering the drive, suitable for critical environment applications.

Built-in EMC Filter

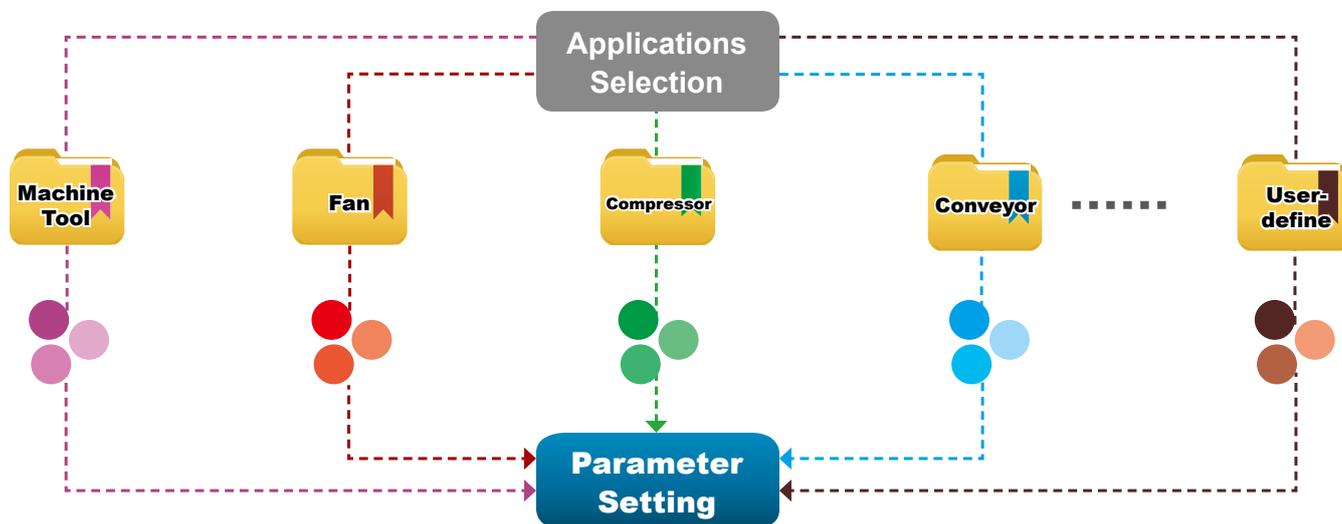

Built-in Class A (C2) standard EMC filter; saves on additional procurement cost and wiring time, and provides more cabinet space for other devices to use.

Quick to Install

Application Groups (Macro)

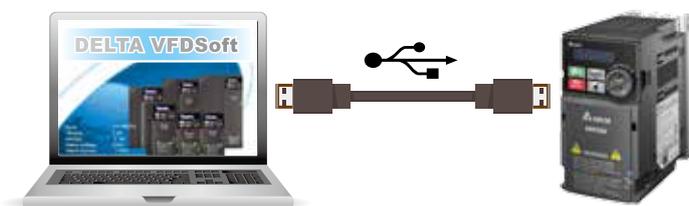

Simplifies the parameter setting process by grouping the parameters for different applications to use.

Built-in USB Port

Built-in USB port facilitates the drive setting, updating, real-time monitoring and system tuning process.

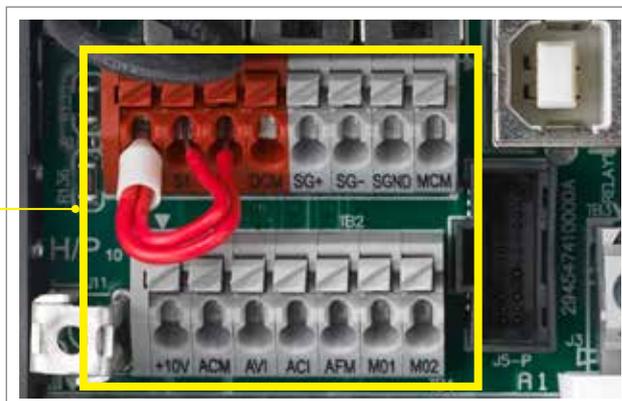

- No need of USB or RS-485 connectors.
- Supports offline (drive power off) parameter setting/copying and system update.

Screwless Wiring of Control Terminal

Press on the cap to plug in the wire; easy to install and remove.

Saves wiring time

Wide Range of Applications

Machine Tools

Features and Benefits

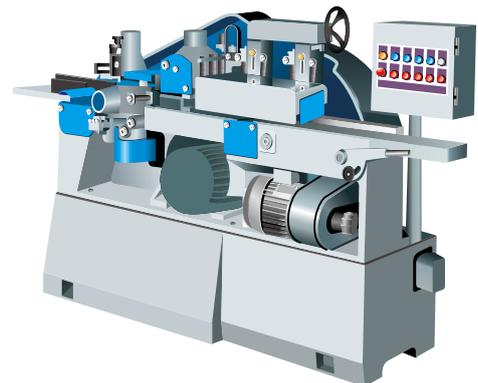

- Supports high-speed main spindle 2000Hz/1500Hz frequency output; and is suitable for complex and high precision processing applications
- Timely acceleration/deceleration control to improve machinery operation efficiency
- Built-in braking chopper to save on purchasing cost
- Built-in PLC capacity for flexible application needs
- Built-in STO function ensures operator safety and effectively reduces accident risk
- Provides deceleration to stop function to protect tools from damage and ensure operator safety

Woodworking Machines

Features and Benefits

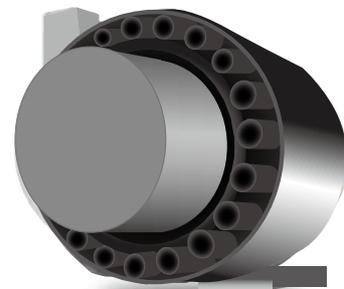

- Timely acceleration/deceleration control, improves machinery operation efficiency
- Built-in STO function ensures operator safety and effectively reduces accident risk
- Built-in PLC capacity saves on purchasing cost
- Built-in EMC filter effectively reduces harmonics interference
- Compact in size and weight, easy to install and maintain

Automatic Tool Changers (ATC)

Features and Benefits

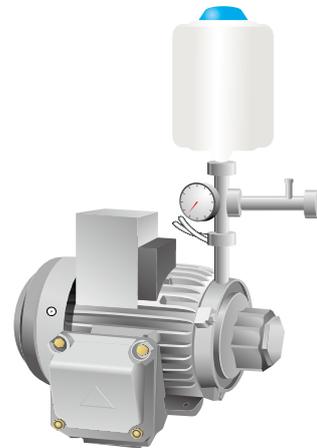

- Compact design of drive provides more cabinet space for other devices to use
- Quick start and timely acceleration/deceleration control function effectively shortens tool changing time and improves system efficiency and productivity
- Simple structure is easy to install and maintain
- Built-in STO function ensures operator safety and effectively reduces accident risk
- Built-in braking chopper, saves on purchasing cost

Pumps Application

Features and Benefits

- Built-in PID feedback control
- Built-in PLC capacity saves on purchasing cost of PLC and relay
- Supports a wide range of input voltages which are suitable for various types of pumps application and use in different countries
- Deceleration energy control mode shortens deceleration time and reduces braking resistor cost, also provides more space for other devices to use

Packaging Machines

Features and Benefits

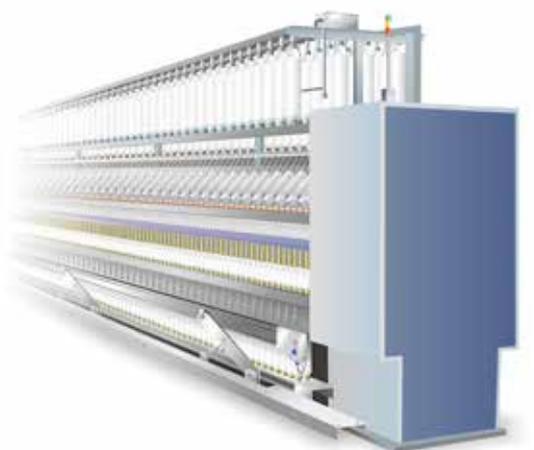

- Compact design of drive provides more cabinet space for other devices to use
- Built-in STO function ensures operator safety and effectively reduces accident rate
- Built-in braking chopper saves on system construction cost
- Built-in RS-485 (MODBUS) and various communication cards upon selection (optional)
- High-speed pulse input
- Supports frequency command by pulse input to improve control precision.
- Precise and stable tension control provides high flexibility in using different packaging materials

Textile Machines

Features and Benefits

- IP40 models provide excellent protection from a high dust, fiber or moisture environment
- Improved heatsink design prevents fiber clogging the air way; modular design of fan is easy to clean and provides longer lifetime
- Improved braking capability shortens the deceleration to stop time and is suitable for sudden stop requirements
- Built-in STO function ensures operator safety and effectively reduces accident rate
- Supports both induction motors and PM motors
- Provides deceleration to stop function to protect the equipment from damage when sudden power failure occurs

MH300 General Specifications and Accessories

Control Functions	Control Methods	V/f, SVC, VF+PG, FOC+PG, TQC+PG	
	Applicant Motors	Induction Motor (IM), Interior Permanent Magnet (IPM) Motor, Surface Permanent Magnet (SPM) Motor	
	Max. Output Frequency	Standard model: 599.00 Hz ; High speed model: 2000 Hz (with derating)	
	Starting Torque*	150% / 3 Hz (V/f, SVC, V/F+PG control for IM · Heavy duty) 200% / 0.5 Hz (FOC control for IM · Heavy duty) 200% / 0 Hz (FOC+PG control for IM · Heavy duty) 100% / (1/20 of motor rated frequency) (SVC control for PM · Heavy duty) 150% / 0 Hz (FOC control for PM · Heavy duty) 200% / 0 Hz (Closed loop vector control w/ PG for PM · Heavy duty)	
	Speed Control Range*	1 : 50 (V/f, SVC, V/F+PG control for IM · Heavy duty) 1 : 100 (FOC control for IM · Heavy duty) 1 : 1000 (FOC+PG control for IM · Heavy duty)	1 : 20 (SVC control for PM · Heavy duty) 1 : 100 (FOC control for PM · Heavy duty) 1 : 1000 (Closed loop vector control w/ PG for PM · Heavy duty)
	Overload Tolerance	Normal Duty (ND): 120% of rated output current for 60 seconds; 150% of rated output current for 3 seconds Heavy Duty (HD): 150% of rated output current for 60 seconds; 200% of rated output current for 3 seconds	
	Frequency Setting Signal	0~+10V/-10V~+10V, 4~20 mA/0~+10V, 2 Pulse input (33KHz), 1 Pulse output (33KHz)	
	Main Control Functions	Multiple motor switches (max. 8 independent motor parameter settings), Fast startup, Deceleration Energy Back (DEB) function, Wobble frequency function, Fast deceleration function, Master and Auxiliary frequency source selectable, Momentary power loss ride thru, Speed search, Over-torque detection, Torque limit, 16-step speed (max.), Accel/decel time switch, S-curve accel/decel, 3-wire sequence, JOG frequency, Upper/lower limits for frequency reference, DC injection braking at start and stop, PID control, Built-in PLC (5K steps), Positioning function, MODBUS and CANopen is integrated as standard	
Protection Functions	Motor Protection	Overcurrent protection, overvoltage protection, over-temperature protection, phase failure protection	
	Stall Prevention	Stall prevention during acceleration, deceleration and running independently	
Accessories	Communication cards	PROFIBUS DP, DeviceNet, MODBUS TCP, EtherNet/IP, EtherCAT	
	PG cards	EMM-PG01L (ABZ · Line driver) EMM-PG01O (ABZ · Open Collector)	EMM-PG01R (Resolver)
	I/O expansion cards	EMM-D33A (Digital Card - 3in 3out) EMM-A22A (Analog Card - 2in 2out)	EMM-R2CA (Relay Card) EMM-R3AA (Relay Card)
	External DC power supply	EMM-BPS01 (DC 24V power supply card)	
Digital Controller		A removable keypad as standard	
Certifications		UL, CE, RoHS, RCM, TUV, REACH	

*Control accuracy may vary depending on the environment, application conditions, different motors or encoder. For details, please contact our company or your local distributor.

MH300 / MS300 Operating Environment

Operating Environment	Installation Location	IEC60364-1/IEC60664-1 Pollution degree 2, Indoor use only		
	Ambient Temperature	Operation	IP20 / UL Open Type	-20 to 50 °C -20 to 60 °C (needs derating)
			IP40 / NEMA 1 / UL Type 1	-20 to 40 °C
			Zero stacking Installation	-20 to 50 °C (needs derating)
		Storage	-40 to 85 °C	
	Transportation	-20 to 70 °C		
		Rated Humidity	Operation	Max. 90%
	Storage / Transportation		Max. 95%	
	Air Pressure	Operation	86 ~ 106 kPa	
		Storage / Transportation	70 ~ 106 kPa	
Pollution Level	Compliance to IEC60721-3-3, 3C2			
Altitude	An altitude of 0 ~ 1000 m for normal operation (derating is required for installation at an altitude above 1000 m)			
Vibration		Compliance to IEC 60068-2-6		
Shock		Compliance to IEC/EN 60068-2-27		

Please refer to the user manual of the MH300/MS300 Series for more details

Control Functions	Control Methods	V/F, SVC
	Applicant Motors	Induction Motor (IM), Interior Permanent Magnet (IPM) Motor, Surface Permanent Magnet (SPM) Motor
	Max. Output Frequency	Standard model: 599.00Hz ; High speed model: 1500.0Hz (with derating, V/F control only)
	Starting Torque*	150% / 3 Hz (V/f, SVC control for IM, Heavy duty) 100% / (1/20 of motor rated frequency) (SVC control for PM, Heavy duty)
	Speed Control Range*	1 : 50 (V/f, SVC control for IM · Heavy duty) 1 : 20 (SVC control for PM · Heavy duty)
	Overload Tolerance	Normal Duty (ND): 120% of rated output current for 60 seconds; 150% of rated output current for 3 seconds Heavy Duty (HD): 150% of rated output current for 60 seconds; 200% of rated output current for 3 seconds
	Frequency Setting Signal	0~+10V/-10V~+10V, 4~20mA/0~+10V, 1 Pulse input (33KHz), 1 Pulse output (33KHz)
Protection Functions	Main Control Functions	Multiple motor switches (max. 4 independent motor parameter settings), Fast run, Deceleration Energy Back (DEB) function, Wobble frequency function, Fast deceleration function, Master and Auxiliary frequency source selectable, Momentary power loss ride thru, Speed search, Over-torque detection, 16-step speed (max.), Accel/decel time switch, S-curve accel/decel, 3-wire sequence, JOG frequency, Upper/lower limits for frequency reference, DC injection braking at start and stop, PID control, Built-in PLC (2K steps), Simple positioning function, MODBUS is integrated as standard
	Motor Protection	Overcurrent protection, overvoltage protection, over-temperature protection, Phase failure protection
Accessories	Stall Prevention	Stall prevention during acceleration, deceleration and running independently
	Communication cards	PROFIBUS DP, DeviceNet, MODBUS TCP, EtherNet/IP, CANopen
Digital Controller	External DC power supply	EMM-BPS01 (DC 24V power supply card)
		A removable keypad as standard
Certifications		UL, CE, RoHS, RCM, TUV, REACH

*Control accuracy may vary depending on the environment, application conditions, different motors or encoder. For details, please contact our company or your local distributor.

Applications

MH300

Machine tools, textile machines, woodworking machines, rubber & plastic machines, cranes

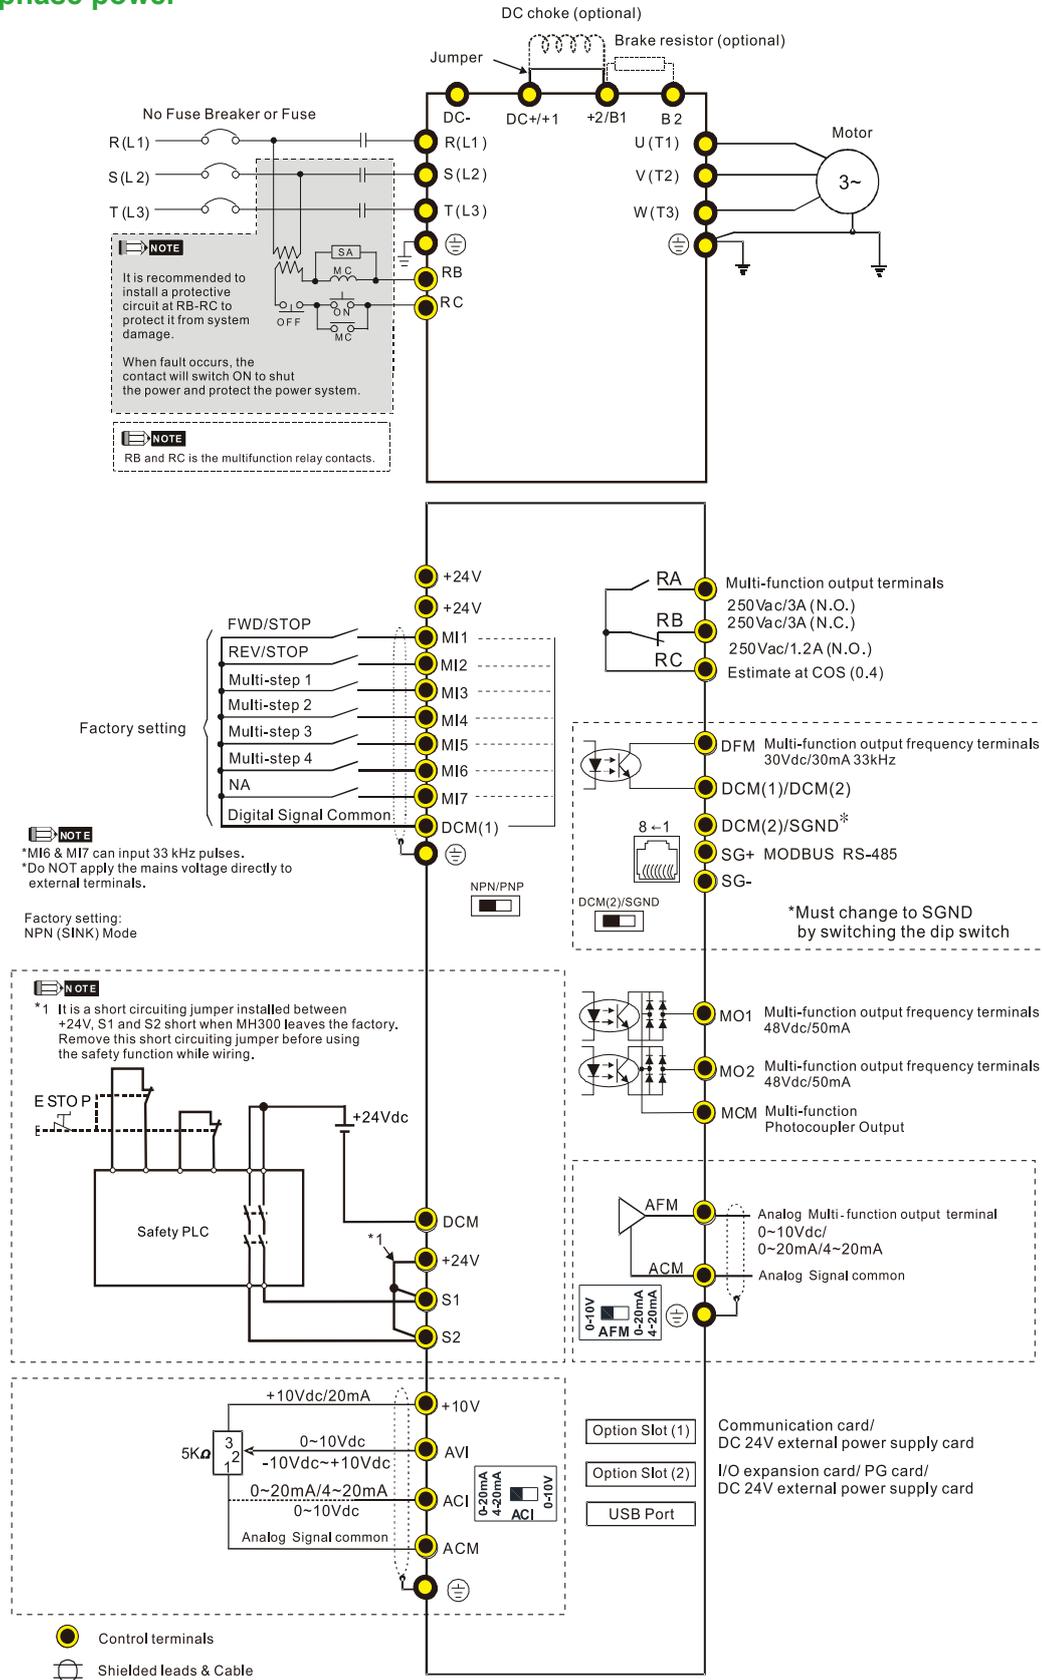

MS300

Machine tools, textile machines, woodworking machines, packaging machines, electronics, fans, pumps, air compressors

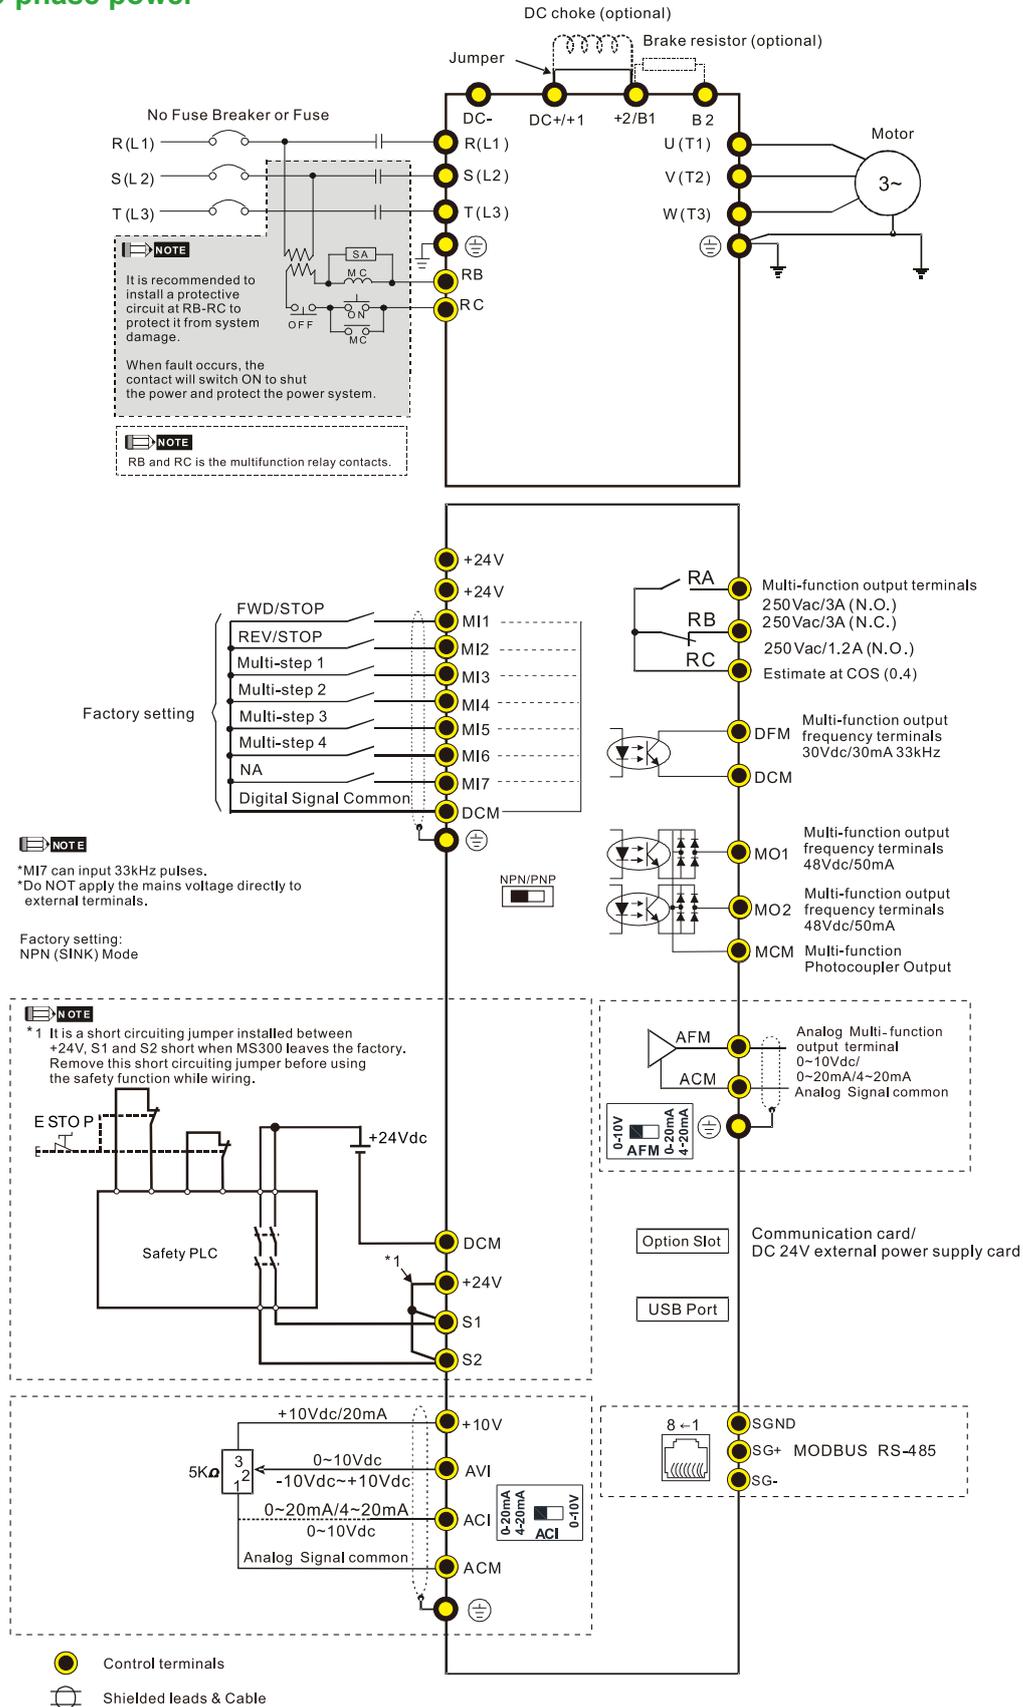

MH300 Wiring

Provides 3-phase power

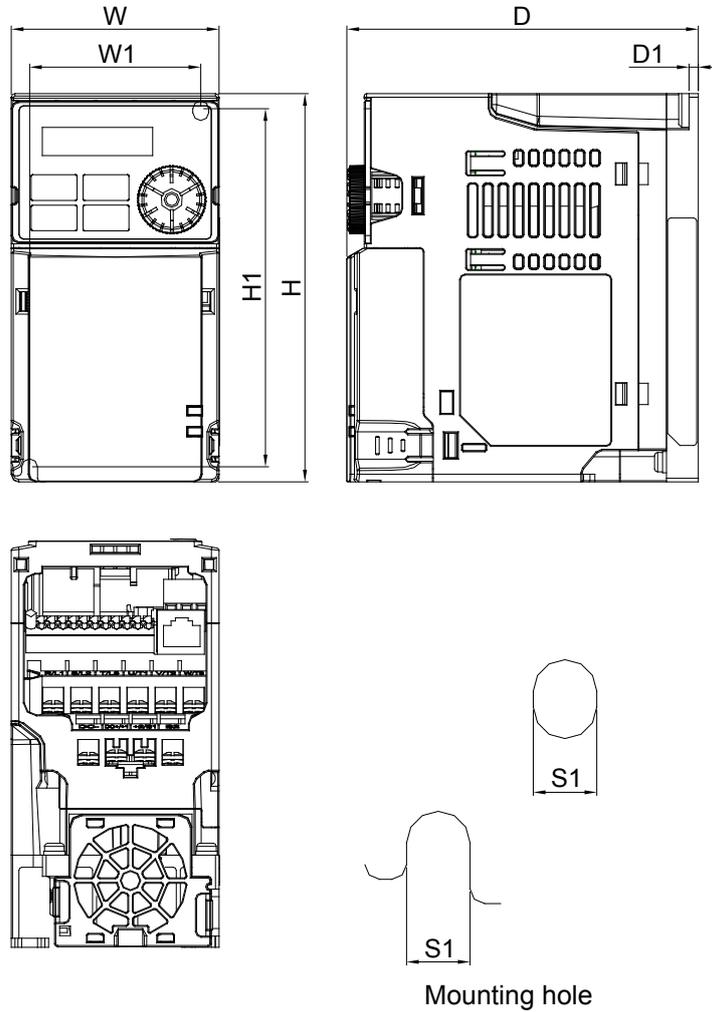

MS300 Wiring

Provides 3-phase power

Accessories

■ EMM-PG01L

		Terminals	Descriptions
 <p>ABZ (Line Driver) Set by Pr.10-00 ~ 10-02</p>	PG1	VP	Output voltage for power: +5V/+12V ± 5% (use FSW3 to switch +5V/+12V) Max. output current: 200 mA
		DCM	Common for power and signal
	PG2	A1,/A1, B1,/B1, Z1,/Z1	Encoder input signal (Line Driver) 1-phase or 2-phase input; Max. input frequency: 300 kP/sec
		A2,/A2, B2,/B2	Pulse input signal (Line Driver or Open Collector) Open collector input: +5V/+12V (Note1) 1-phase or 2-phase input; Max. input frequency: 300 kP/sec
	PG OUT	AO,/AO, BO,/BO, ZO,/ZO,SG	PG card output signals. Division frequency function: 1 ~ 255 times Max. output voltage for Line driver: 5V _{DC} Max. output current: 50 mA; Max. output frequency: 300 kP/sec SG: The GND of PG card is the same as the host controller or PLC, so a common output signal is attained.
Ground	PE	Earthing terminal to reduce noise; this terminal should also be grounded.	

■ EMM-PG01O

		Terminals	Descriptions
 <p>ABZ (Open Collector) Set by Pr.10-00 ~ 10-02</p>	PG1	VP	Output voltage for power: +5 V / +12 V ± 5% (use SSW320 to switch +5 V /+12 V) Max. output current: 200 mA
		DCM	Common for power and signal
	PG2	A1,/A1, B1,/B1, Z1,/Z1	Encoder input signal (Line Driver or Open Collector) Open collector input: +5 V / +12 V (Note1) 1-phase or 2-phase input; Max. input frequency: 300 KP / Sec
		A2,/A2, B2,/B2	Pulse input signal (Line Driver or Open Collector) Open collector input : +5 V / +12 V (Note1) 1-phase or 2-phase input; Max. input frequency: 300 KP / Sec
	PG OUT	V+- V- /AO, /BO, /ZO,SG	Needs external power source for PG OUT circuit. Input voltage of power:+7 V ~ +24 V Negative power supply input PG card output signals. Division frequency function: 1 ~ 255 times Add a pull-up resistor (1.8 KΩ / 1 W) to the open collector output signals to avoid signal interferences. Max. Output current: 20 mA; Max output frequency: 300 KP / sec SG: The GND of PG card is the same as the host controller or PLC, so a common output signal is attained.
Ground	PE	Earthing terminal to reduce noise; this terminal should also be grounded.	

■ EMM-PG01R

		Terminals	Descriptions
 <p>Resolver Set by Pr.10-00 ~ 10-02</p>	PG1	R1- R2	Resolver output power 7 V _{rms} , 10 kHz
		S1,S2, S3, S4	Resolver input signal 3.5 ± 0.175 V _{rms} · 10 kHz
	PG2	A2,/A2, B2,/B2	Pulse input signal (Line Driver or Open Collector) Open collector input : +5 V / +12 V (Note1) 1-phase or 2-phase input; Max. input frequency: 300 KP / Sec
		AO,/AO, BO,/BO, ZO,/ZO,SG	PG card output signals. Division frequency function: 1 ~ 255 times Max. output voltage for Line driver: 5 V _{DC} Max. output current: 50 mA, Max. output frequency: 300 KP / sec SG: The GND of PG card is the same as the host controller or PLC, so a common output signal is attained.
Ground	PE	Earthing terminal to reduce noise; this terminal should also be grounded.	

■ EMM-BPS01

		Terminals	Descriptions
 <p>24V Power Shift Card</p>		PE GND 24 V	When the AC motor drive power is off, the external power supply card provides external power to the network system, PLC function, and other functions to allow continued operations. Input power: 24 V ± 5% Maximum input current: 0.5 A Note: 1) Do not connect the control terminal +24 V (Digital control signal common: SOURCE) directly to the EMC-BPS01 input terminal 24 V. 2) Do not connect control terminal GND directly to the EMC-BPS01 input terminal GND in order to achieve good isolation.

Note 1: For the Open Collector, set input voltage to 5 ~ 15 mA and install a pull-up resistor

[5 V] Recommend pull-up resistor: 100 ~ 220 Ω, 1 / 2 W and above

[12 V] Recommend pull-up resistor: 510 ~ 1.35 KΩ, 1 / 2 W and above

[24 V] Recommend pull-up resistor: 1.8K ~ 3.3 KΩ, 1 / 2 W and above

■ EMM-D33A

 Digital I/O Extension Card	Terminals	Descriptions
	24V \ DCM	Output power: +24 VDC \pm 5 % 200 mA, 5 W
	MI10 ~ MI12	Refer to Pr. 02-26~ Pr. 02-28 to program the multi-function. Choose SINK (NPN) / SOURCE (PNP) from SWW1. Internal power is supplied by terminal 24V: +24 Vdc \pm 5% 200 mA, 5 W. If external power is +24 VDC, the max. voltage is 30 VDC and the min. voltage is 19 VDC. ON: the activation current is 6.5 mA. OFF: leakage current tolerance is 10 μ A.
	MO10 ~ MO12	Refer to Pr. 02-36~ Pr. 02-38 to program the multi-function The motor drive releases various monitor signals, such as drive in operation, frequency attained and overload indication, via transistor (open collector). MO output signal: each MO terminal needs a pull-up resistor, the max. external power voltage is 48 V _{oc} / 50 mA
	MCM	Common for multi-function output terminals MO10 ~ MO12 (photocoupler)
PE	Earthing terminal to reduce noise; this terminal should also be grounded.	

■ EMM-A22A

 Analog I/O Extension Card	Terminals	Descriptions
	ACM	Common output signal and input signal terminals
	AI10 \ AI11	Refer to Pr. 14-00~ Pr. 14-01 to program the multi-function Two AI ports: switch between J9, J19 for AVI or ACI AVI10~AVI11: input 0~10.00 V \pm 0.05 V ACI10~ACI11: input 0~20.00 mA \pm 0.05 mA
	AO10 \ AO11	Refer to Pr. 14-12 ~Pr. 14-13 to program the multi-function Two AO ports: switch between J2, J22 for AVO or ACO AVO10~AVO11: output 0~10.00 V \pm 0.05 V ACO10~ACO11: output 0~20.00 mA \pm 0.05 mA
	PE	Earthing terminal to reduce noise; this terminal should also be grounded.

■ EMM-R2CA

 Relay Extension Card	Terminals	Descriptions
	RA10~RA11 RB10~RB11 RC10~RC11	Refer to Pr. 02-36~ Pr. 02-37 to program the multi-function Resistive load: 5 A (N.O.) / 240 VAC Function: To output each monitor signal, such as drive is in operation, frequency attained or overload indication.

■ EMM-R3AA

 Relay Extension Card	Terminals	Descriptions
	RA10 ~ RA12 RC10 ~ RC12	Refer to Pr. 02-36~ Pr. 02-38 to program the multi-function Resistive load: 6 A (N.O.) / 250 VAC Function: To output each monitor signal, such as drive is in operation, frequency attained or overload indication.

■ Screw Specification of Option Card Terminals

Screw Specification of Option Card Terminals	Wire Gauge	Torque	Screw Specification of Option Card Terminals	Wire Gauge	Torque
EMM-PG01L	30 ~ 16 AWG (0.0509 ~ 1.31 mm ²)	2 Kg-cm [1.74 lb-in]	CMM-COP01	30 ~ 16 AWG (0.0509 ~ 1.31 mm ²)	2 Kg-cm [1.74 lb-in]
EMM-PG01O			CMM-MOD01 /		
EMM-PG01R			CMM-EIP01		
EMM-A22A			CMM-EC01		
EMM-D33A			CMM-PD01		
EMM-BPS01	30 ~ 16 AWG (0.0509 ~ 1.31 mm ²)	8 Kg-cm [6.94 lb-in]	CMM-DN01		
EMM-R2CA	24~12 AWG	5 Kg-cm			
EMM-R3AA	(0.205 ~ 3.31 mm ²)	[4.34 lb-in]			

Accessories

▪ CMM-EIP01

EtherNet/IP Option Card

Features

- ▶ Supports max. 32 words input and 32 words output of I/O connection
- ▶ User-defined parameter mapping
- ▶ MDI/MDI-X auto-detect
- ▶ IP Filter, basic firewall function
- ▶ E-mail alarm

Network Interface

Network protocol	EtherNet/IP	Interface	RJ-45
Transmission speed	10/100Mbps	Number of port	1
Transmission method	I/O connection/ Explicit message	Transmission cable	Category 5e shielding
Transmission distance	100m, extension is allowed via switch		

▪ CMM-MOD01

MODBUS TCP Option Card

Features

- ▶ MDI/MDI-X auto-detect
- ▶ IP Filter, basic firewall function
- ▶ E-mail alarm

Network Interface

Network protocol	MODBUS TCP	Interface	RJ-45
Transmission speed	10/100Mbps	Number of port	1
Transmission distance	100m, extension is allowed via switch	Transmission cable	Category 5e shielding

▪ CMM-COP01

CANopen Option Card

Features

- ▶ Complies with CiA 402 standard (default setting)
- ▶ 4 sets of RX/TX PDO
- ▶ Dual communication ports
- ▶ Node address and Baud rate can be set in the AC motor drive
- ▶ Supports Delta protocol, DMCNET

Network Interface

Network protocol	CANopen	Interface	RJ-45
Transmission speed	1M/ 500k/ 250k/ 125k/ 100k/ 50kbps	Number of port	2
Transmission method	PDO, SDO	Transmission cable	Delta standard
Transmission distance	25m / 1Mbps		

▪ CMM-DN01

DeviceNet Option Card

Features

- ▶ Support Group 2 only connection method and cyclic I/O data exchange
- ▶ Provides EDS file to identify DeviceNet equipment information
- ▶ Supports max. 32 words input and 32 words output of parameter mapping
- ▶ Node address and Baud rate can be set in the AC motor drive

Network Interface

Network protocol	DeviceNet	Interface	Terminal block
Transmission speed	500k/ 250k/ 125k/ 100k/ 50k bps and extendable baud rate mode of 1M	Number of port	1
Transmission method	Explicit message/ Implicit message	Transmission cable	Delta standard
Transmission distance	25m / 1Mbps		

■ CMM-PD01

PROFIBUS DP Option Card

Features

- ▶ Supports PZD cyclic data exchange
- ▶ Supports user diagnosis function.
- ▶ Supports PKW read/write to AC motor drive parameters
- ▶ Auto-detects baud rates; supports Max. 12 Mbps.

Network Interface

Network protocol	PROFIBUS DP	Interface	DB9
Transmission speed	9.6k/ 19.2k/ 93.75k/ 187.5k/ 500k/ 1.5M/ 3M/ 6M/ 12Mbps	Number of port	1
Transmission method	Cyclic / non-cyclic data exchange	Transmission cable	Delta standard
Transmission distance	100m / 12Mbps		

■ CMM-EC01

EtherCAT Option Card

Features

- ▶ Supports velocity mode
- ▶ Complies with CANopen CiA402 (CoE)
- ▶ Parameter reading/writing
- ▶ Disconnection treatment

Network Interface

Network protocol	EtherCAT	Interface	RJ-45
Transmission speed	100Mbps	Number of port	2
Transmission distance	100 m	Transmission cable	Delta standard

■ Delta Standard Fieldbus Cables

Delta Cables	Part Number	Description	Length
CANopen Cable	UC-CMC003-01A	CANopen cable, RJ45 connector	0.3m
	UC-CMC005-01A	CANopen cable, RJ45 connector	0.5m
	UC-CMC010-01A	CANopen cable, RJ45 connector	1m
	UC-CMC015-01A	CANopen cable, RJ45 connector	1.5m
	UC-CMC020-01A	CANopen cable, RJ45 connector	2m
	UC-CMC030-01A	CANopen cable, RJ45 connector	3m
	UC-CMC050-01A	CANopen cable, RJ45 connector	5m
	UC-CMC100-01A	CANopen cable, RJ45 connector	10m
	UC-CMC200-01A	CANopen cable, RJ45 connector	20m
DeviceNet Cable	UC-DN01Z-01A	DeviceNet cable	305m
	UC-DN01Z-02A	DeviceNet cable	305m
Ethernet/EtherCAT Cable	UC-EMC003-02A	Ethernet/EtherCAT cable, Shielding	0.3m
	UC-EMC005-02A	Ethernet/EtherCAT cable, Shielding	0.5m
	UC-EMC010-02A	Ethernet/EtherCAT cable, Shielding	1m
	UC-EMC020-02A	Ethernet/EtherCAT cable, Shielding	2m
	UC-EMC050-02A	Ethernet/EtherCAT cable, Shielding	5m
	UC-EMC100-02A	Ethernet/EtherCAT cable, Shielding	10m
	UC-EMC200-02A	Ethernet/EtherCAT cable, Shielding	20m
CANopen/DeviceNet TAP	TAP-CN01	1 in 2 out, built-in 121Ω terminal resistor	1 in 2 out
	TAP-CN02	1 in 4 out, built-in 121Ω terminal resistor	1 in 4 out
	TAP-CN03	1 in 4 out, RJ45 connector, built-in 121Ω terminal resistor	1 in 4 out
PROFIBUS Cable	UC-PF01Z-01A	PROFIBUS DP cable	305m

Model Name Explanation

VFD 1A6 MH 43 A N S A A

Variable Frequency Drive

Rated Output Current
Under Heavy Duty Mode (150% 60 seconds)

Series Name
MH : High Performance MH300
MS : Standard MS300

Input Voltage
11 : 115V 1-phase
21 : 230V 1-phase
23 : 230V 3-phase
43 : 460V 3-phase

IP Level
A : IP20
E : IP40 (Anti-dust)

Version

Model Type
A : Standard Model
N : No cooling fan
*Only for MH300 1HP(0.75kW) model
(230V 3-phase / 460V 3-phase)
H : High Speed Model

Safe Torque Off (STO)
S : Integrated STO

EMC Filter
N : No Function
F : Built-in EMC Filter

Attention

Standard Motors

Used with 400V Standard Motors

It is recommended to add an AC output reactor when using with a 400V standard motor to prevent damage to motor insulation.

Torque Characteristics and Temperature Rise

When a standard motor is drive controlled, the motor temperature will be higher than with DOL operation.

Please reduce the motor output torque when operating at low speeds to compensate for less cooling efficiency.

For continuous constant torque at low speeds, external forced motor cooling is recommended.

Vibration

When the motor drives the machine, resonances may occur, including machine resonances. Abnormal vibration may occur when operating a 2-pole motor at 60Hz or higher.

Noise

When a standard motor is drive controlled, the motor noise will be higher than with DOL operation.

To lower the noise, please increase the carrier frequency of the drive. The motor fan can be very noisy when the motor speed exceeds 60Hz.

Special Motors

High-speed Motor

To ensure safety, please try the frequency setting with another motor before operating the high-speed motor at 120Hz or higher.

Explosion-proof Motor

Please use a motor and drive that comply with explosion-proof requirements.

Submersible Motor & Pump

The rated current is higher than that of a standard motor.

Please check before operation and select the capacity of the AC motor drive carefully.

The motor temperature characteristics differ from a standard motor, please set the motor thermal time constant to a lower value.

Brake Motor

When the motor is equipped with a mechanical brake, the brake should be powered by the mains supply.

Damage may occur when the brake is powered by the drive output. Please DO NOT drive the motor with the brake engaged.

Gear Motor

In gearboxes or reduction gears, lubrication may be reduced if the motor is continuously operated at low speeds.

Please DO NOT operate in this way.

Synchronous Motor

These motors need suitable software for control. Please contact Delta for more information.

Single-phase Motor

Single-phase motors are not suitable for being operated by an AC Motor Drive. Please use a 3-phase motor instead when necessary.

Environmental Conditions

Installation Position

1. The drive is suitable for installation in a place with ambient temperature from -10 to 50°C.
2. The surface temperature of the drive and brake resistor will rise under specific operation conditions. Therefore, please install the drive on materials that are noncombustible.
3. Ensure that the installation site complies with the ambient conditions as stated in the manual.

Wiring

Limit of Wiring Distance

For remote operation, please use twist-shielding cable and the distance between the drive and control box should be less than 20m.

Maximum Motor Cable Length

Motor cables that are too long may cause overheating of the drive or current peaks due to stray capacitance.

Please ensure that the motor cable is less than 30m.

If the cable length can't be reduced, please lower the carrier frequency or use an AC reactor.

Choose the Right Cable

Please refer to current value to choose the right cable section with enough capacity or use recommended cables.

Grounding

Please ground the drive completely by using the grounding terminal.

How to Choose the Drive Capacity

Standard Motor

Please select the drive according to applicable motor rated current listed in the drive specification.

Please select the next higher power AC drive in case higher starting torque or quick acceleration/deceleration is needed.

Special Motor

Please select the drive according to: Rated current of the drive > rated current of the motor

Transportation and Storage

Please transport and store the drive in a place that meets environment specifications.

Peripheral Equipment

Molded-Case Circuit Breakers (MCCB)

Please install the recommended MCCB or ELCB in the main circuit of the drive and make sure that the capacity of the breaker is equal to or lower than the recommended one.

Add a Magnetic Contactor(MC) in the Output Circuit

When a MC is installed in the output circuit of the drive to switch the motor to commercial power or other purposes, please make sure that the drive and motor are completely stopped and remove the surge absorbers from the MC before switching it.

Add a Magnetic Contactor (MC) in the Input Circuit

Please only switch the MC ONCE per hour or it may damage the drive. Please use RUN/STOP signal to switch many times during motor operation.

Motor Protection

The thermal protection function of the drive can be used to protect the motor by setting the operation level and motor type (standard motor or variable motor). When using a high-speed motor or a water-cooled motor the thermal time constant should be set to a lower value.

When using a longer cable to connect the motor thermal relay to a motor, high-frequency currents may enter via the stray capacitance.

It may result in malfunctioning of the relay as the real current is lower than the setting of thermal relay. Under this condition, please lower the carrier frequency or add an AC reactor to solve this.

DO NOT Use Capacitors to Improve the Power Factor

Use a DC reactor to improve the power factor of the drive. Please DO NOT install power factor correction capacitors on the main circuit of the drive to prevent motor faults due to over current.

Do NOT Use Surge Absorber

Please DO NOT install surge absorbers on the output circuit of the drive.

Lower the Noise

To ensure compliance with EMC regulations, usually a filter and shielded wiring is used to lower the noise.

Method Used to Reduce the Surge Current

Surge currents may occur in the phase-lead capacitor of the power system, causing an overvoltage when the drive is stopped or at low loads.

It is recommended to add a DC reactor to the drive.
