

TPDxE05U06 1, 4, 6 Channel ESD Protection Device for Super-Speed (Up to 6 Gbps) Interface

1 Features

- IEC 61000-4-2 level 4 ESD protection
 - $\pm 12\text{kV}$ contact discharge
 - $\pm 15\text{kV}$ air gap discharge
- IEC 61000-4-4 EFT protection
 - 80A (5/50ns)
- IEC 61000-4-5 surge protection
 - 2.5A (8/20 μs)
- IO capacitance 0.42pF to 0.5pF (typical)
- DC breakdown voltage 6.5V (minimum)
- Ultra low leakage current 10nA (maximum)
- Low ESD clamping voltage
- Industrial temperature range: -40°C to $+125^{\circ}\text{C}$
- Easy straight-through routing packages
- Industry standard SOD-523 package (1.60mm $\times$ 0.80mm $\times$ 0.65mm)

2 Applications

- [HDMI 2.0](#)
- [USB 3.0](#)
- [MHL](#)
- [LVDS interfaces](#)
- [DisplayPort](#)
- [PCI-express®](#)
- [eSata interfaces](#)
- [V-by-One® HS](#)

3 Description

The TPDxE05U06 is a family of unidirectional Transient Voltage Suppressor (TVS) based Electrostatic Discharge (ESD) protection diodes with ultra-low capacitance. Each device can dissipate ESD strikes above the maximum level specified by the IEC 61000-4-2 international standard. The TPDxE05U06 ultra-low loading capacitance makes the device an excellent choice for protecting any high-speed signal pins.

Typical applications for TPDxE05U06 includes high speed signal lines in HDMI 1.4b, HDMI 2.0, USB 3.0, MHL, LVDS, DisplayPort, PCI-Express®, eSata, and V-by-One® HS.

5 Specifications

Absolute Maximum Ratings

over operating free-air temperature range (unless otherwise noted) ⁽¹⁾

		MIN	MAX	UNIT
Electrical Fast Transient (2) (3)	IEC 61000-4-4 (5/50ns)		80	A
Peak Pulse (2) (3)	IEC 61000-4-5 Current (8/20us)		2.5	A
	IEC 61000-4-5 Power (8/20us)		40	W
T _A	Ambient Operating Temperature	-40	125	°C
T _{stg}	Storage Temperature	-65	155	°C

- (1) Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These are stress ratings only, which do not imply functional operation of the device at these or any other conditions beyond those indicated under Recommended Operating Conditions. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) Voltages are with respect to GND unless otherwise noted.
- (3) Measured at 25°C

5.1 ESD Ratings—JEDEC Specification

			VALUE	UNIT
V _(ESD)	Electrostatic discharge – DPY, DQA, and RVZ	Human body model (HBM), per ANSI/ESDA/ JEDEC JS-001 ⁽¹⁾	±4000	V
		Charged device model (CDM), per JEDEC specification JESD22-C101 ⁽²⁾	±1500	V
V _(ESD)	Electrostatic discharge – DYA	Human body model (HBM), per ANSI/ESDA/ JEDEC JS-001	±2500	V
		Charged device model (CDM), per JEDEC specification JS-002	±1000	V

- (1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process. Manufacturing with less than 500-V HBM is possible with the necessary precautions. Pins listed as ±4000 V may actually have higher performance.
- (2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process. Manufacturing with less than 250-V CDM is possible with the necessary precautions. Pins listed as ±1500 V may actually have higher performance.

5.2 ESD Ratings—IEC Specification

			VALUE	UNIT
V _(ESD)	Electrostatic discharge	IEC 61000-4-2 contact discharge	±12000	V
		IEC 61000-4-2 air-gap discharge	±15000	

Recommended Operating Conditions

over operating free-air temperature range (unless otherwise noted)

		MIN	NOM	MAX	UNIT
V _{IO}	Input pin voltage	0		5.5	V
T _A	Operating free-air temperature	-40		125	°C

6 Detailed Description

6.1 Overview

The TPDxE05U06 is a family of unidirectional Transient Voltage Suppressor (TVS) based Electrostatic Discharge (ESD) protection diodes with ultra-low capacitance. Each device can dissipate ESD strikes above the maximum level specified by the IEC 61000-4-2 international standard. The TPDxE05U06 ultra-low loading capacitance makes the device an excellent choice for protecting any high-speed signal pins.

6.2 Functional Block Diagram

Figure 6-1. TPD1E05U06 Block Diagram

Figure 6-2. TPD4E05U06 Block Diagram

Figure 6-3. TPD6E05U06 Block Diagram

6.3 Feature Description

The TPDxE05U06 is a family of unidirectional Transient Voltage Suppressor (TVS) Electrostatic Discharge (ESD) protection diodes with ultra-low capacitance. Each device can dissipate ESD strikes above the maximum level specified by the IEC 61000-4-2 international standard. The TPDxE05U06s ultra-low loading capacitance makes it an excellent choice for protecting any high-speed signal pins.

6.3.1 ± 15 -kV IEC61000-4-2 Level 4 ESD Protection

The I/O pins can withstand ESD events up to ± 12 -kV contact and ± 15 -kV air. An ESD-surge clamp diverts the current to ground.

6.3.2 IEC61000-4-4 EFT Protection

The I/O pins can withstand an electrical fast transient burst of up to 80 A (5/50 ns waveform, 4 kV with 50- Ω impedance). An ESD-surge clamp diverts the current to ground. This has been validated on the TPD4E05U06 only.

6.3.3 IEC61000-4-5 Surge Protection

The I/O pins can withstand surge events up to 2.5 A and 40 W (8/20 μ s waveform). An ESD-surge clamp diverts this current to ground.

6.3.4 I/O Capacitance

The capacitance between each I/O pin to ground is 0.42 pF (TPD1E05U06), 0.5 pF (TPD4E05U06) or 0.47 pF (TPD6E05U06). These devices support data rates up to 6 Gbps.

6.3.5 DC Breakdown Voltage

The DC breakdown voltage of each I/O pin is a minimum of 6.5V, which protects sensitive equipment from surges above the reverse standoff voltage of 5.5V.

6.3.6 Ultra-Low Leakage Current

The I/O pins feature an ultra-low leakage current of 10 nA (maximum) with a bias of 2.5 V.

6.3.7 Low ESD Clamping Voltage

The I/O pins feature an ESD clamp that is capable of clamping the voltage to 10 V ($I_{PP} = 1$ A).

6.3.8 Industrial Temperature Range

This device features an industrial operating range of -40°C to $+125^{\circ}\text{C}$.

6.3.9 Easy Flow-Through Routing

The layout of this device makes it simple and easy to add protection to an existing layout. The package offers flow-through routing, requiring minimal modification to an existing layout.

6.4 Device Functional Modes

The TPDxE05U06 is a passive integrated circuit that triggers when voltages are above VBR or below the lower diodes V_f (-0.6 V). During ESD events, voltages as high as ± 15 kV (air) can be directed to ground via the internal diode network. When the voltages on the protected line fall below the trigger levels of TPDxE05U06 (usually within 10s of nano-seconds) the device reverts to passive.

7 Application and Implementation

Note

Information in the following applications sections is not part of the TI component specification, and TI does not warrant its accuracy or completeness. TI's customers are responsible for determining suitability of components for their purposes, as well as validating and testing their design implementation to confirm system functionality.

7.1 Application Information

The TPDxE05U06 is a diode type TVS which is typically used to provide a path to ground for dissipating ESD events on hi-speed signal lines between a human interface connector and a system. As the current from ESD passes through the TVS, only a small voltage drop is present across the diode. This is the voltage presented to the protected IC. The low R_{DYN} of the triggered TVS holds this voltage, V_{CLAMP} , to a safe level for the protected IC.

7.2 Typical Applications

7.2.1 HDMI 2.0 Application

Figure 7-1. HDMI 2.0 Schematic

7.2.1.1 Design Requirements

For this design example, the two TPD4E05U06 devices, and a TPD5S116 are being used in an HDMI 2.0 application. This provides a complete port protection scheme.

Given the HDMI 2.0 application, the parameters listed in [Table 7-1](#) are known.

Table 7-1. Design Parameters

DESIGN PARAMETER	VALUE
Signal range on pins 1, 2, 4, or 5	0 V to 5 V
Operating frequency	3 GHz

7.2.1.2 Detailed Design Procedure

7.2.1.2.1 Signal Range on Pin 1, 2, 4, or 5

The TPD4E05U06 has 4 identical protection channels for signal lines. The symmetry of the device provides flexibility when selecting which of the 4 I/O channels is going to protect which signal lines. Any I/O supports a signal range of 0 to 5.5 V.

7.2.1.3 Application Curves

Figure 7-2. 3.4-Gbps HDMI 1.4 TP1 Eye Diagram Unpopulated EVM

7.2.2 HDMI 2.0 Application

Figure 7-10. HDMI 2.0 Schematic

7.2.2.1 Design Requirements

For this design example, the TPD1E05U06 and the TPD5S116 are used to protect the data pairs and control lines of the HDMI 2.0 connection. This provides full HDMI 2.0 port protection.

Given the HDMI 2.0 application, the following parameters in [Table 7-2](#) are known.

Table 7-2. Design Parameters

DESIGN PARAMETER	VALUE
Signal range on data lines	0 V to 5 V
Operating frequency	3 GHz

7.2.2.2 Detailed Design Procedure

7.2.2.2.1 Signal Range

The TPD1E05U06 has 1 protection channel for signal lines, supporting a signal range of 0 V to 5.5 V.

7.2.2.2.2 Operating Frequency

The TPD1E05U06 has 0.42 pF of capacitance, which supports HDMI 2.0 data rates.

7.2.2.3 Application Curves

Refer to the [Section 7.2.1.3](#) section.

7.3 Power Supply Recommendations

This device is a passive ESD protection device and there is no need to power it. Care must be taken to make sure that the maximum voltage specifications for each line are not violated.

7.4 Layout

7.4.1 Layout Guidelines

- The optimum placement is as close to the connector as possible.
 - EMI during an ESD event can couple from the trace being struck to other nearby unprotected traces, resulting in early system failures.
 - The PCB designer needs to minimize the possibility of EMI coupling by keeping any unprotected traces away from the protected traces which are between the TVS and the connector.
- Route the protected traces as straight as possible.
- Eliminate any sharp corners on the protected traces between the TVS and the connector by using rounded corners with the largest radii possible.
 - Electric fields tend to build up on corners, increasing EMI coupling.

7.4.2 Layout Example

7.4.2.1 TPD4E05U06 Layout Example

This application is typical of an HDMI 1.4 layout.

Figure 7-11. TPD4E05U06 Layout

7.4.2.2 TPD1E05U06 Layout Example

This application is typical of an HDMI 2.0 layout.

8.5 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

NOTES: (continued)

7. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.
8. Board assembly site may have different recommendations for stencil design.

GENERIC PACKAGE VIEW

DQA 10

1 x 2.5, 0.5 mm pitch

USON - 0.55 mm max height

PLASTIC SMALL OUTLINE - NO LEAD

This image is a representation of the package family, actual package may vary.
Refer to the product data sheet for package details.

4230320/A

DQA0010A

PACKAGE OUTLINE

USON - 0.55 mm max height

PLASTIC SMALL OUTLINE - NO LEAD

NOTES:

1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.

⁽¹⁾ **Status:** For more details on status, see our [product life cycle](#).

⁽²⁾ **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

⁽³⁾ **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

(4) Lead finish/Ball material: Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

(5) MSL rating/Peak reflow: The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

(6) Part marking: There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
