1 Description

The electronics housings of the EH...F series consist of a lower housing part that can be combined with three different housing covers. The housing is available in seven overall widths.

The housing covers are snapped onto the lower housing part. They are available with connection technology openings either on one side or on both sides. Closed housing covers are also available. They can be provided with customer-specific openings.

The design as modular electronics housing ensures shock and contamination-proof accommodation of electronics.

Different connection technologies for the PCBs can be integrated in the housing. The PCBs can be mounted horizontally. They also have a large assembly area.

The housings can be snapped onto symmetrical DIN rails according to EN 60715. Wall mounting is also possible.

The housings are available in two material versions, ABS and ABS-PC. The material versions are approved for the flammability ratings HB (ABS) or V0 (ABS-PC) according to UL94.

The housing covers are provided with integrated marking fields for equipment identification.

8.5 Pin strip, pitch 5 for PCB L3

Contact surface: tin. Assembly: soldering

Voltage and current depend on the installed plug-in terminal. The value of the weaker component is always valid. The pin strip is made of high-temperature proof plastic. This makes it suitable for the reflow process.

9 Mounting the housing

9.1 Mounting on a DIN rail

The housing is supplied with a base latch for DIN rail mounting as standard.

Figure 30 Snapping the housing onto the DIN rail (A) and removing it (B)

Mounting

- Place the device onto a grounded 35 mm DIN rail from above so that the upper housing keyway hooks onto the top edge of the DIN rail (A).
- Holding the device by the housing cover, carefully push it toward the mounting surface.
- Once the snap-on foot has audibly snapped onto the DIN rail, check that it is attached securely.

Removal

- Use a suitable screwdriver to release the locking mechanism on the snap-on foot of the device (B).
- Hold onto the device by the housing cover and carefully tilt it upwards.
- Carefully lift the device off the DIN rail.

9.2 Mounting on a mounting surface

The housing can be supplied with a base latch for wall mounting on customer request.
