

## 1. Electric Characteristics.

## 2. Configuration and Dimension.

CODE : 11535  
จ.อ.ป.

### Material

| Item | Material             | Description         |
|------|----------------------|---------------------|
| 1    | Bobbin               | Nylon               |
| 2    | Copper wire          | 2UEW                |
| 3    | Insulation tape      | 0.025mm             |
| 4    | Laminations Steel    | EI-19-RG11 x 0.35mm |
| 5    | Pin                  | 06305-150812        |
| 6    | Varnish              | Hi-term Bc-359      |
| 7    | Lead free Solder bar | 60/40 Sn / Pb       |

### Electric Characteristics

| Inductance (±10%).                                                               |          | Resistance (±10%). |
|----------------------------------------------------------------------------------|----------|--------------------|
| B-A                                                                              | 39.93 mH | 2.70 Ω             |
| D-C                                                                              | 1.40 uH  | 1.30 mΩ            |
| Remaks.                                                                          |          |                    |
| Print code, date of manafactory.<br>Stack the lamination steel EI-19 one by one. |          |                    |
