Note (備註):

1. The Voltage Drop values are measured at 100% rated current.
2. The Power Dissipation values are measured after testing at 150% rated current for one hour (0.5 hour for 8A – 20A) except 25A which are tested at 100% rated current.
3. The above figures are typical values for reference only and should not be used as acceptance criteria.
4. Please consult factory for availability of other ratings.
