

Automation for a Changing World

Delta Human Machine Interface DOP Series

One Touch Gives You Limitless Possil

Meets Customer Needs. Satisfies a Variety of Applications. Provides Multiple Functions. Creates

A Wide Range of Options

Three serial communication interfaces (RS-232/RS-422/RS-485), USB disk, Ethernet, audio output, SD card and more are supported for various applications.

Powerful Controller Drivers Support

Not just Delta industrial automation products, but more than 30 brands, and over 100 models of PLCs or controllers can be connected for effortless communication and versatile operation.

Energy Saving and Environmental Automation

All models are equipped with LED backlights which provide energy-efficient lighting that is made without mercury, reduces energy use and CO2 emissions, and protects the environment.

High Quality and Full-Color Display

A full 65,536-color display is available on all models. With a whole new 2D drawing technique, the screen resolution is enhanced for more realistic images and for more colorful and vivid displays.

Product Line-up

DOP-B series

The DOP-B series provides various types and different sizes of touch panel HMIs with multiple dimensions and colors, and also offers fast and convenient control functions to meet the diverse application requirements demanded of industrial automation machines.

		DO	P-B		
4.3 inches Wide	Aust	B03S211 B03E211	7 inches		B07S515 B07E515 B07PS515

DOP-H Series

The DOP-H series provides handheld type HMIs and customized teaching pendants for controlling and programming the motion of robot arms and other motion control systems.

DOP-W Series

The DOP-W series offers large-size HMIs that come with high resolution and high brightness touch screens, and should be your first choice to meet customer needs for a wide range of high-end industrial automation applications.

High Quality Display

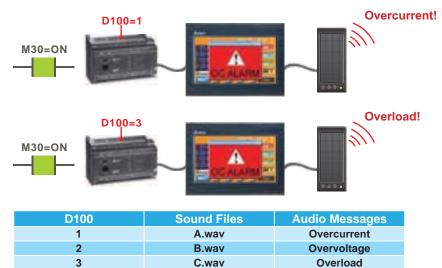

65,536-color high quality TFT display offers more realistic and vivid images to capture and visualize system and manufacturing processes more quickly.

Audio Output Interface

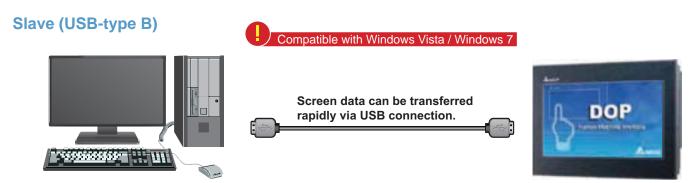

In case of errors, an alarm alerts users via an audio message in real time.

▶ As the broadcast of alarms is triggered by the corresponding bit, the alarm messages can be played and output in different sound files by setting values of word registers.

Supports Various Peripherals via USB Hub

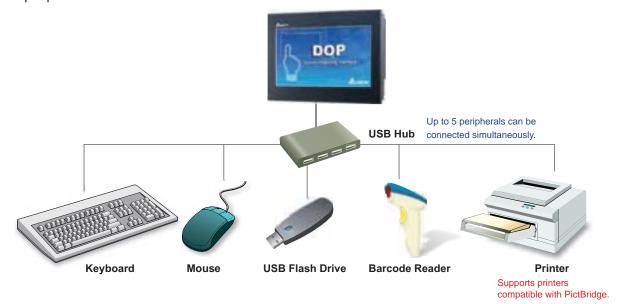

Up to 480Mbps high-speed data transfer via USB v2.0

Using the bypass function, enable monitoring functions and modify PLC programs directly via the USB connection.

Master (USB-type A)

Various peripherals can be connected via a USB Hub.

SD Card / USB Disk Versatile Storage Interface -

Exploiting the convenience of an SD card or USB disk, screen data transfer and collection can be quickly performed and the storage capacities of the HMI can be easily increased. No need to worry about data capacity of excessive history and recipe data

▶ SD card and USB disk are in FAT32 format, fully compatible with Microsoft Windows and allow filenames that exceed eight characters in length

The recipe data can be saved in CSV format and easily edited on an external PC in Excel to effectively save PLC memory.

History and alarm information can also be saved in CSV format and stored to the SD card / USB disk.

- Multiple project screen data can be saved in SD card / USB disk simultaneously and transferred to HMI. No need to connect to a PC
- The data saved in an SD card / USB disk can be encrypted and the number of copies can be limited to protect the programs from unauthorized use

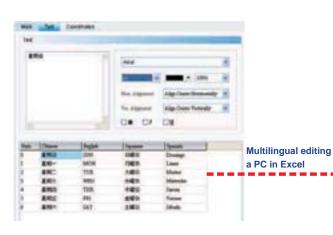

- ▶ PLC ladder diagrams can be transferred and backed up via SD card / USB disk even in a location where an external PC is not available
- SD card / USB disk are capable of storing several PLC ladder diagrams

Multilingual Display

Up to 32 languages are available. No need to redesign the screen data! A benefit for marketing the equipment to manufacturers and end users around the world.

Password Settings

Provides 8 levels of passwords to set user security and prevent improper use. Only the security level that is equal to or higher than the current setting can use the element.

Element Invisible Function

The element on the screen can be hidden by triggering the corresponding bit.

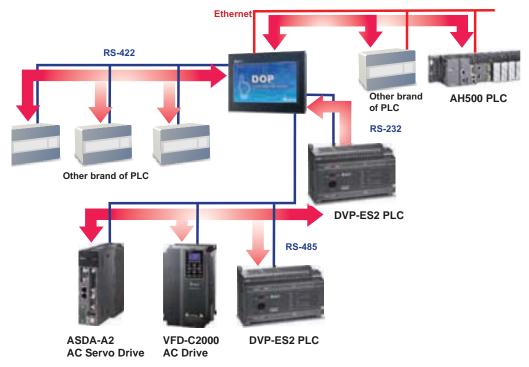

Provides Diverse Communication Interfaces

Easy to communicate with more than 30 brands of PLCs/Controllers

All DOP series models support RS-232/485/422 communication interfaces and over 20 different PLC/Controller drivers. With the aid of an Ethernet interface, it is possible to use four communication interfaces at the same time, easily connecting to various industrial automation devices for a complete communication network link managed by Delta's new DOP series.

VGA Model

DOP-B10VS511 supports VGA video input which integrates live video and HMI display into one unit. Incorporated with Delta's DMV series machine vision system, Delta offers an integrated solution that delivers precise and reliable control to meet the needs of industry upgrades and bring benefits to our customers around the world.

Integrates Delta Professional Functions (PS Models Only):

G-Code

- Supports Delta's motion controllers: DVP-10MC / DVP-20PM / AH20MC
- Capable of viewing and changing the G-code files with the HMI
- Supports serial and Ethernet communications

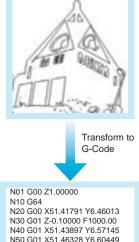

Drawing Machine

ASDA-A2 **Servo Drive**

Electronic Cam (E-Cam) Curve Table

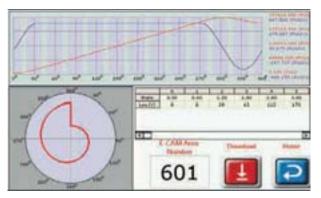

- Supports ASDA-A2 series servo drives
- ► A personal computer is not required. Electronic cam curves can be generated on HMI and downloaded to the ASDA-A2 series servo drive directly

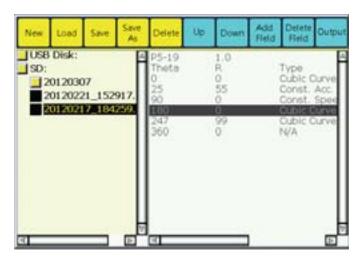

USB disk

Supports E-Cam table macro for making E-Cam curve on HMI

- Auto rotary shear with sealing zone
- Indirect printing
- Auto rotary shear cos compensation

Supports cubic curve manual creation

DOP-W Features

The Ultimate in Industrial Versatility

- ▶ 1GHz high speed processor for higher computing performance
- ► Aluminum enclosure: greater vibration resistance and higher tolerance for ambient environments compared with plastic enclosure.
- ► The enclosure with dark gray mold texturing is easily cleaned and ideal for the medical and food sectors.
- ► 1024 x 768 pixels high resolution and high brightness display (W127B: 500 cd/m², W157B: 450 cd/m²)
- ▶ 256MB Flash ROM
- ► Highly reliable touch panel with min. 10,000,000 touches

Front Speaker

- ► The built-in stereo amplifying speaker provides efficient alarm notifications. No additional speaker is required.
- ▶ Apart from replacing general alarm with buzzers, functions for playing recorded voice and reminders are available for multiple applications.
- Mechanism design breakthrough. The front panel including the front speaker has acquired the IP65 waterproof certificate.

Multiple Peripheral Interfaces

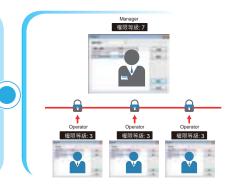

- Supports 2 COM Ports
- Supports 2 Ethernet Ports
- Supports 3 USB Host 2.0 Ports
- Supports SD card
- Apart from traditional mounting, DOP-W also supports the VESA standard mounting interface making wall mounts easier.

*VESA mounting interface is only available on devices above 12 inches.

Multi-User Authority Management

This function allows users to assign authority levels and register passwords to set permissions for different user groups for security control. No need for third-party configuration and set-up costs.

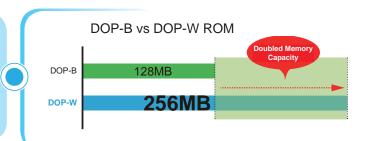

- 8 levels of user authority Level: 0 ~ 7
- ▶ 8 sets of user accounts with passwords for each user authority

High-Capacity Memory

Increased memory capacity stores more nonvolatile data, such as alarm messages and historical records than ever before for power-loss protection.

More Powerful Remote Monitoring Function

- Compatible with eRemote
- Supports VNC Server
 - Monitoring by eRemote software or web browser on PC
 - Apps for eRemote or VNC Client support Apps on Android devices
 - VNC Client supported Apps on iOS devices
 - * JAVA is required in web browsers.

Two Individual Ethernet Ports

➤ Two individual Ethernet ports are equipped as standard, one is for HMI communication and the other is for external I/O for quick and easy integration.

Multilingual Display

- In addition to English and numbers, 16 languages are supported for a more localized interface
 - * Supports English, Traditional Chinese, and Simplified Chinese only during the launching period.
 - * Other languages such as Arabic, French, German, Hebrew, Hindi, Portuguese, Spanish, Japanese, Korean, Thai, Turkish, Russian, and Persian are continually added.

Video Player

► A new video player with self-defined playlist allows users to manage the list based on different applications.

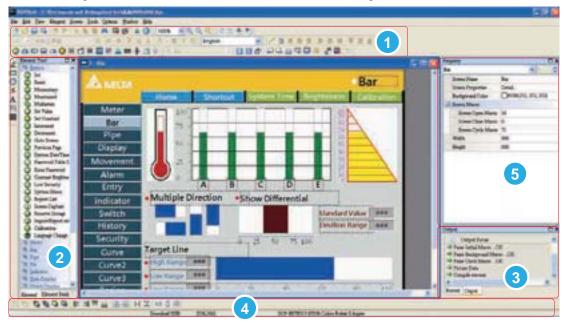

* Supported Format: WMV

DOPSoft

The all new and upgraded configuration software provides complete functions and a user-friendly operator interface. Make editing easier than ever with a whole new level of design.

1) Toolbar

Actions such as edit, save, upload and compile can be executed easily just by clicking the attractive and easy-to-see icons on the toolbar.

3) Output Window

The Output Window displays all the editing actions and output messages when the compile function is enabled. Once an error occurs, the error messages are displayed in Output Window as well.

5) Property Table

The Property Table displays the element property settings for each element.

2) Element Tool Window

The Element Tool Window provides a wide variety of element icons for selection. Use the mouse to select the desired element icon and drag it onto the work place to create a new element.

4) Layout Toolbar

The Layout Toolbar offers Bring to Front, Send to Bottom, Align, Across / Down Space Evenly, Make Same Size and other functions for the benefit of creating intricate and beautiful elements.

Picture Bank

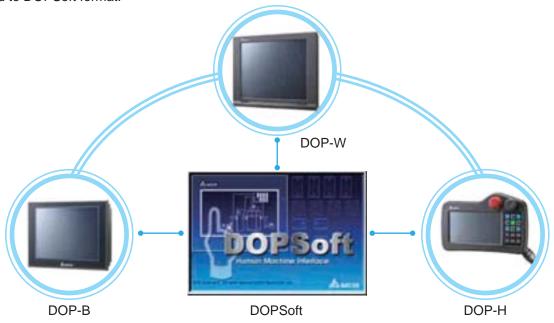

Newly designed picture bank offers more colorful and attractive elements.

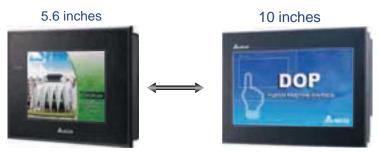

Convenient Screen Data Conversion

Compatible with all DOP series, project files can be easily upgraded and converted to DOPSoft format.

The screen data can be converted to different models even if the display size is not the same. The same project can be applied on different models.

*After the screen data is converted, it still needs to confirm the element position, text size and other settings.

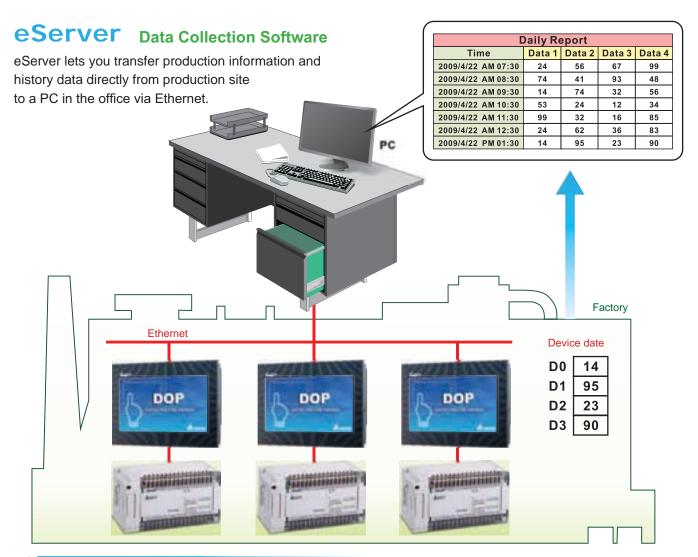

Minimum System Requirements of DOPSoft

Hardware / Software	System Requirements				
CPU	Pentium4 1.6GHz or greater is recommended				
Memory	2G MB and above is recommended				
Hard Disk	Capacity: 400MB and above				
Monitor	Supports resolution: 800 x 600 or higher full-color display				
Printer	Printer compatible with Windows 2000 Windows XP / Windows Vista / Windows 7				
Operating System	Windows 2000 / Windows XP Windows Vista / Windows 7				

^{*}Users can download the DOPSoft configuration software and the user manual at Delta's website via the following link: http://www.deltaww.com

Solution for Constructing a Network between Office and Production Site via Ethernet

1) Excel Sampling Data

- Collected data can be saved in user-defined Excel files according to purpose and to easily create production reports
- ▶ If the formulas in the Excel file are set in advance, the production data, i.e. defective rate, average working hours and capacity utilization rate, and more can be calculated in real time while production data is recorded
- ▶ Production data can be saved in daily reports, weekly reports, monthly reports, and others automatically under different settings.

2 Database Sampling Data

▶ Users can access any database via ODBC (Open Database Connectivity) interface

3) Recipe Data Transfer

Users can transfer and backup the recipe data via eServer easily

eRemote Remote Control Software

eRemote lets you view and monitor the same screen shown on the HMI at the production site, and control the manufacturing process via Ethernet. No matter where you are, remote control is easily accomplished.

Minimum System Requirements for eServer / eRemote

Hardware / Software	System Requirements
CPU	Pentium 4,1.6GHz or greater is recommended
Memory	2G MB and above is recommended
Hard Disk	Capacity: 100MB and above
Monitor	Supports resolution: 1024 x 768 or higher full-color display.
Printer	Printer compatible with Windows 2000 / Windows XP / Windows Vista / Windows 7
Operating System	Windows 2000 / Windows XP / Windows Vista / Windows 7

^{*}Users can download the eServer / eRemote software and the user manual at Delta's website via the following link: http://www.deltaww.com

¹⁾ The half-life of backlight is defined as original luminance being reduced by 50% when the maximum driving current is supplied to HMI.

2) With built-in isolated power circuit.

3) Please use isolated power supply.

4) Some models are in the process of application for UL and KCC certification. For more information, please consult our distributors.

5) The value of the power consumption indicates the electrical power consumed by HMI with no peripheral devices connected.

To ensure normal operation, it is recommended using a power supply with a capacity 1.5 –2 times the value of the power consumption.

6) The content of this catalogue may be revised without prior notice. Please consult our distributors or download the most updated version at http://www.deltaww.com

1) The half-life of backlight is defined as original luminance being reduced by 50% when the maximum driving current is supplied to HMI.										Approx. 1520 g	Approx. 1520 g	Approx. 1520 g

¹⁾ The half-life of backlight is defined as original luminance being reduced by 50% when the maximum driving current is supplied to HMI.
2) With built-in isolated power circuit.
3) Please use isolated power supply.
4) Some models are in the process of application for UL and KCC certification. For more information, please consult our distributors.
5) The value of the power consumption indicates the electrical power consumed by HMI with no peripheral devices connected.
To ensure normal operation, it is recommended using a power supply with a capacity 1.5 ~2 times the value of the power consumption.
6) The content of this catalogue may be revised without prior notice. Please consult our distributors or download the most updated version at http://www.deltaww.com
