

MEI CASHFLOW™ series 7000

MEI CASHFLOW™ series 7000 uses intelligence to unlock the cash in your machines and increase your profitability

With the highest coin capacity in the market and five active tubes the MEI CASHFLOW™ series 7000 virtually eliminates exact change situations on even the most demanding sites. However, by constantly monitoring the coin flow it can also work to reduce the cash tied up in tubes where the vend price or throughput allows a more efficient level in each tube, even advising on a more suitable tube configuration when appropriate.

Acceptance and Security

The MEI CASHFLOW™ series 7000 incorporates market leading discrimination technology to ensure the highest level of valid coin acceptance

Coin management

Whether you choose to leave the MEI CASHFLOW™ series 7000 in stand alone mode or customize its configuration it will constantly work on your behalf to offer your customers change whilst minimising the cash tied up in your machine.

Reliability and Serviceability

The MEI CASHFLOW™ series 7000 builds on MEI's reputation for reliability and with a fully accessible coin path and clear diagnostics via a large display any problems that might arise can be easily corrected in the field with the minimum of training.

LCD Panel

Display and intuitive smart menu

IRDA

Easy-to-use wireless infra-red port

Sonar technology

Accurately monitors coins filled manually and the exact value of coins in the tubes
