MC4 Leads

- Connect directly to PV modules or strings fitted with Multicontact MC4 Test plugs and sockets fitted with gold plated contacts.

There's a number of different Solar PV installation in current use. Often, their leads connecting the array to the inverter are different too. You may need a variety of leads to use on different jobs. MC4 are some of the most common connectors, these leads enable the range of Seaward solar pv testers to connect to a PV installation which uses MC4 connectors.
