Features

- High CRI, high-efficacy warm white LEDs designed for high-performance directional lighting applications.
- High lumen density of monolithic emitter, up to 503 lm/mm² (3000K), ideal for minimizing the fixture size while maximizing the optical efficiency in beam quality critical architectural lighting applications.
- Maximum Drive Current: 2 A
- Luminous Efficacy: typ. 130 lm/W @ 350 mA, 85°C (3000K)
- Color Temperature: 2700K, 3000K, 3500K, 4000K
- Color Rendering Index: > 95
- Low thermal resistance: 1.6 °C/W
- ANSI-compatible chromaticity bins
- LM-80 10,000-hr test data available, excellent TM-21 lifetime and color stability
- Available in 2 soldering footprint configurations
- Electrically isolated thermal path
- 8 kV HBM ESD rating per ANSI/ESDA/JEDEC JS-001
- RoHS and REACH compliant

Applications

Notes

1. The Ordering Part Number specifies the Minimum Flux Bin in shipment; higher flux bins may be shipped without advance notice. Please refer to 'Luminous Flux Binning' table for details of all flux bins.
2. Shipments always adhere to the color bins specified in each Chromaticity Bin Kit. See 'Chromaticity Bin Kit Codes' table for the color bins included in each Bin Kit.
3. See 'Mechanical Dimensions' for A and B types' solder pad configurations. All product mechanical, electrical and optical specifications are otherwise identical.

K4	139	148	156	256	346	478	592

Notes

- LEDs are measured at 25°C ambient temperature with 350 mA 20ms single pulse. The measured values are correlated to 350mA at 85°C junction temperature (T_j). Luminus maintains a ±6% tolerance on flux measurement.
- Flux values at other junction temperature (T_j) and/or forward current conditions are calculated and for reference only.

Forward Voltage Binning

Voltage Bin Code	Binning @ 350mA, T _j =85°C	
	Minimum Voltage (V)	Maximum Voltage (V)
VH	2.5	2.7
VJ	2.7	2.9
VK	2.9	3.1

Note: Individual voltage bins are not orderable.

Note: Luminus maintains a tolerance of ± 0.005 on chromaticity (Cx, Cy), and ± 2 on Color Rendering Index (CRI) measurements.

Product Characteristics

Parameter	Symbol	Minimum	Typical	Maximum	Unit
Viewing Angle (FWHM)	$2\theta_{1/2}$		120		Degree
Color Rendering Index	CRI	95			
Thermal resistance (Electrical) Junction/Solder Point	$R_{thjs-EL}$		1.6		°C/W
Junction Temperature	T_j			115	°C
Forward Voltage (@ $I_f=350$ mA, $T_j=85^\circ\text{C}$)	V_f	2.5	2.71	3.1	V
DC Forward Current	I_f	0.2		2	A
Surge Current (t < 10 ms, Duty Cycle < 10%)	I_{s-max}			3	A
Reverse Voltage ($I_r=10$ mA)	V_r			5	V
Power Dissipation	P_d			7	W
Operating Temperature	T_{opr}	-40		100	°C
Storage Temperature	T_{stg}	-40		100	°C
ESD withstand Voltage HBM Per ANSI/ESDA/JEDEC JS-001	V_{HBM}	8			kV
ESD withstand Voltage CDM Per ANSI/ESDA/JEDEC JS-002	V_{CDM}	1			kV

Optical & Electrical Characteristics

Relative Luminous Flux vs. Forward Current

$$\Phi_v / \Phi_v(0.35A), T_j = 85^\circ\text{C}$$

Relative Luminous Flux vs. Temperature(T_j)

$$\Phi_v / \Phi_v(85^\circ\text{C}), I_f = 0.35A$$

Forward Voltage vs. Forward Current

$$V_f = f(I_f), T_j = 85^\circ\text{C}$$

Relative Forward Voltage vs. Temperature(T_j)

$$\Delta V_f = V_f(T_j) - V_f(85^\circ\text{C}), I_f = 0.35A$$

Relative Chromaticity vs. Forward Current

$$\Delta \text{CIEx}, y = \text{CIEx}, y(I_f) - \text{CIEx}, y(0.35A), T_j = 85^\circ\text{C}$$

Relative Chromaticity vs. Temperature(T_j)

$$\Delta \text{CIEx}, y = \text{CIEx}, y(T_j) - \text{CIEx}, y(85^\circ\text{C}), I_f = 0.35A$$

Relative Spectral Power Distribution

$I_f=0.35A$, $T_j=85^{\circ}C$

Typical Radiation Characteristics (A120 and B120 Types)

$I_f=0.35A$, $T_j=25^{\circ}C$

Soldering Profile

SMT Rework Guideline	Manual Hotplate Reflow	Hot Air Gun Reflow
Heating Time	< 60 sec	
Hotplate Temperature	< 245°C	< 150°C

Notes

- Product complies to Moisture Sensitivity Level 3 (MSL 3).
- The numbers in the table are specific to SAC305. Luminus recommends using an SAC305 solder paste with a no-clean flux for RoHS compliant products.
- During the pick and place process, axial forces on the dome (or window) should not exceed 0.5 Newtons (N).
- Use of a multi-zone IR reflow oven with a nitrogen blanket is recommended.
- Time-temperature profile of the reflow process showing the four functional profile zones are defined in IPC-7801. Temperature is referenced to the center of the PCB.
- Luminus recommends to use the solder paste data sheet information as a starting point in time-temperature process development.
- These are general guidelines. Consult the solder paste manufacturer's datasheet for guidelines specific to the alloy and flux combination used in your application. For more information, please refer to: <https://luminusdevices.zendesk.com/hc/en-us/articles/360060306692-How-do-I-Reflow-Solder-Luminus-SMD-Components->
- For any technical questions about soldering process, please contact Luminus at techsupport@luminus.com.

Precautions for Use

Storage:

1. Before opening the package

The LEDs should be kept at a temperature lower than 40° C and relative humidity lower than 90%. The LEDs should be used within a year. When storing the LEDs, moisture proof package with absorbent material (silica gel) is recommended.

2. After opening the package

The LEDs should be kept at a temperature lower than 30° C and relative humidity lower than 60%. The LEDs should be soldered within 168 hours (7days) after opening the moisture proof package.

If unused LEDs remain, they should be stored in moisture proof packages, such as sealed containers with moisture absorbent material (silica gel). It is also recommended to return the unused LEDs to the original moisture proof package and to seal it again.

If the moisture absorbent material (silica gel) vaporizes or passes the expiration date, baking treatment should be performed by using the following conditions : 60 °C for 20 hours.

The LED's electrode and lead frame comprise a silver plated copper alloy. The silver surface may be affected by environments. Please avoid conditions which may cause the LEDs to corrode or discolor. The corrosion or discoloration might lower solderability or affect optical characteristics.

Please avoid rapid transition in ambient temperature, especially in high humidity environments where condensation can occur.

Static Electricity:

1. The products are sensitive to static electricity, and care should be taken when handling them.

2. Static electricity or surge voltage will damage the LEDs. It is recommended to wear anti-electrostatic gloves or wristband when handling the LEDs.

3. All devices, equipment and machinery must be properly grounded. It is recommended that measures be taken against surge voltage to the equipment that mounts the LEDs.

A120 Package Configuration

Mechanical Dimensions

All dimensions are in millimeter ± 0.13 mm

Recommended PCB Solder Pad and Stencil Pattern

All dimensions are in millimeter ± 0.13 mm

B120 Package Configuration

Mechanical Dimensions

All dimensions are in millimeter ± 0.13 mm

Recommended PCB Solder Pad and Stencil Pattern

All dimensions are in millimeter ± 0.13 mm

Tape and Reel - A120 and B120 Package Configurations

All dimensions are in millimeter ± 0.13 mm

Packaging and Labeling

Packaged Reel

Label on Reel

Label Information	
CPN	Luminus ordering part number
MPN	For Luminus internal use
QTY	Quantity of parts per reel
Flux	Single flux bin code (see <i>Luminous Flux Binning</i> table on page 3)
Voltage	Single voltage bin code (see <i>Forward Voltage Binning</i> table on page 3)
Color	Single chromaticity bin code (see <i>Chromaticity Bin Coordinates</i> table on page 4 and 5)
CRI	N/A
Lot ID & Reel ID	For Luminus internal use

Packaging Boxes

Box Size 1 - 5 reels per box
 Size: 22.5 x 24.5 x 6.5 cm

Label contains the type, lot number, quantity and product parameters

Box Size 2 - 10 reels per box
 Size: 22.5 x 24.5 x 13 cm

Label contains the type, lot number, quantity and product parameters

Shipping Label on Packaging Box

Multiple labels are attached to the box (one label per reel inside the box)

Label Information	
CPN	Luminus ordering part number
CID	Customer ID
QTY	Quantity of parts per reel
Flux	Single flux bin code (see <i>Luminous Flux Binning</i> table on page 3)
Voltage	Single voltage bin code (see <i>Forward Voltage Binning</i> table on page 3)
Color	Single chromaticity bin code (see <i>Chromaticity Bin Coordinates</i> table on page 4 and 5)
CRI	N/A
Lot ID & Reel ID	For Luminus internal use
