1 PREVIEW

The document is user manual for service, repair and maintenance of VCDM.

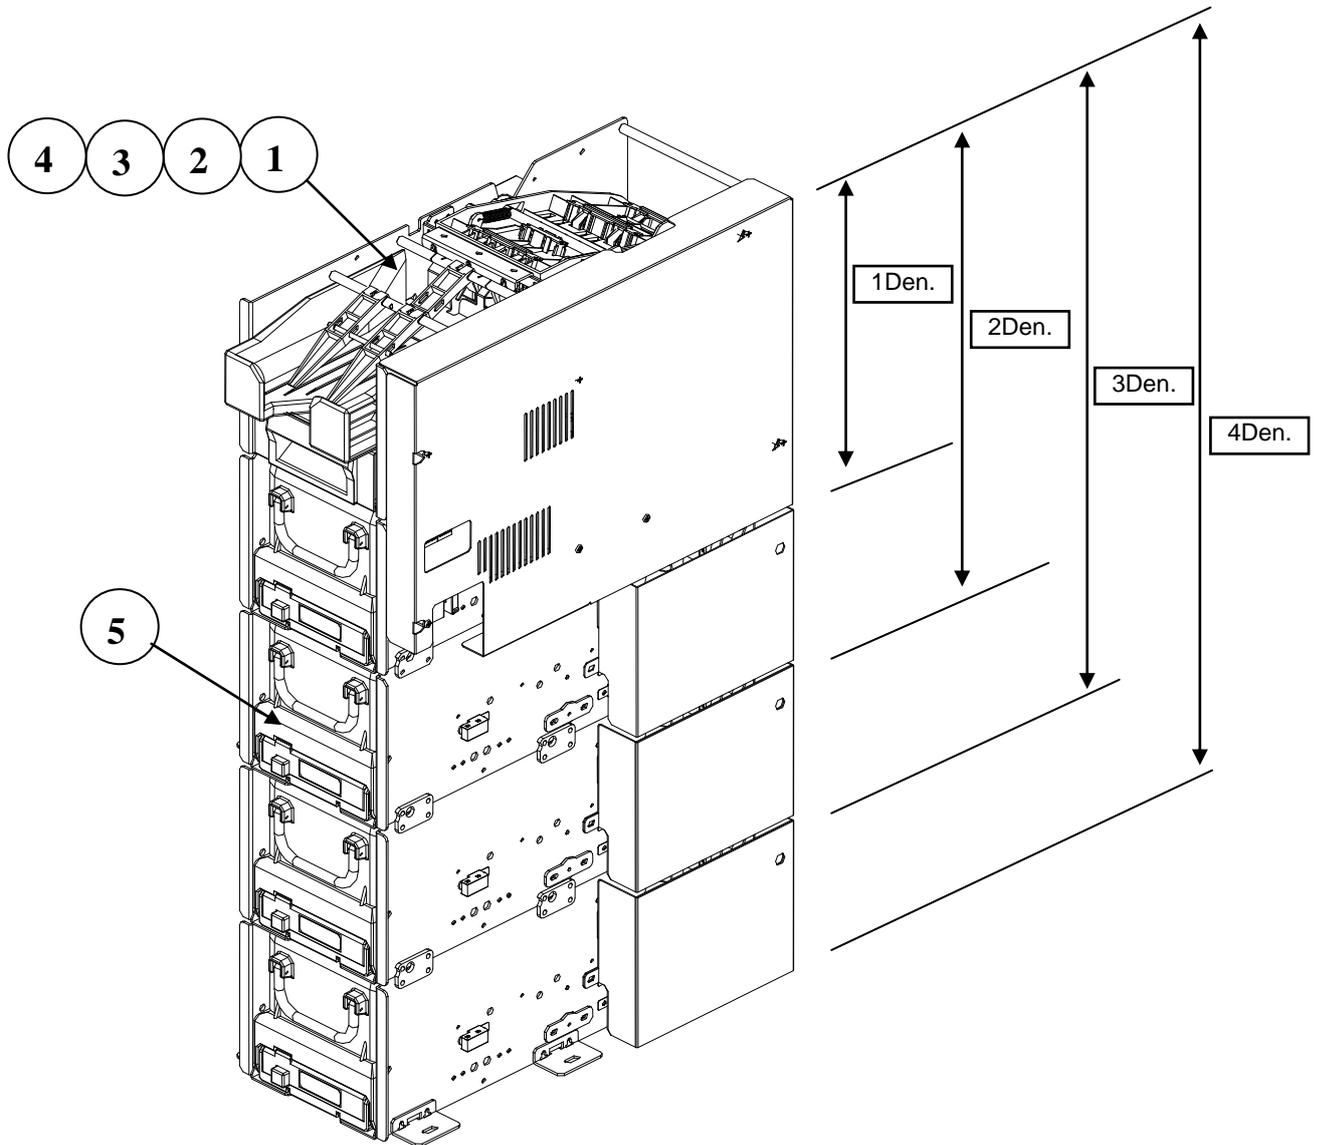

2 BASIC SPECIFICATION AND STRUCTURE

2.1 BASIC SPECIFICATION

| Spec | NO | Item | Details |
|--------------------------|----|------------------------------|--|
| General Specification | 1 | Denomination | 1 / 2 / 3 / 4 |
| | 2 | Cassette Capacity (mm) | 60 mm |
| | 3 | Dispensing Speed (notes/sec) | 3 (based on note to note) |
| | 4 | Note Size Available (mm) | Width: 120~165, Height: 62~82 |
| | 5 | Double Note Detection | Ultrasonic Type |
| | 6 | Reject Capacity (notes) | Max 20 notes |
| | 7 | Access Type | Front Access Type |
| | 8 | Dimension (mm) | 1 denomination: 169(W)x220(H)x349(D) 2 denomination: 169(W)x330(H)x349(D) 3 denomination: 169(W)x440(H)x349(D) 4 denomination: 169(W)x550(H)x349(D) |
| | 9 | Interface | RS232C |
| | 10 | Near End | Optional by Dip S/W 1) Disabled: All banknotes are dispensed. 2) Enabled: 5~15 of banknotes will be remained. |
| Electrical Specification | 1 | Rated Voltage | DC24V±10% |
| | 2 | Rated Consuming Current (A) | 1) Standby Status : 0.28 2) Average Dispense Current : 2.6 3) Peak Current : 7.0 (120 ms) |
| Operation Specification | 1 | Operation Temperature (°C) | +0~+40 |
| | 2 | Storage Temp (°C) | -10~+60 |
| | 3 | Operation Humidity (%RH) | 20~80 |
| | 4 | Storage Humidity (%RH) | 10~90 |

3 MAIN MECHANISM CONFIGURATION

3.1 UNIT VCDM MECHA

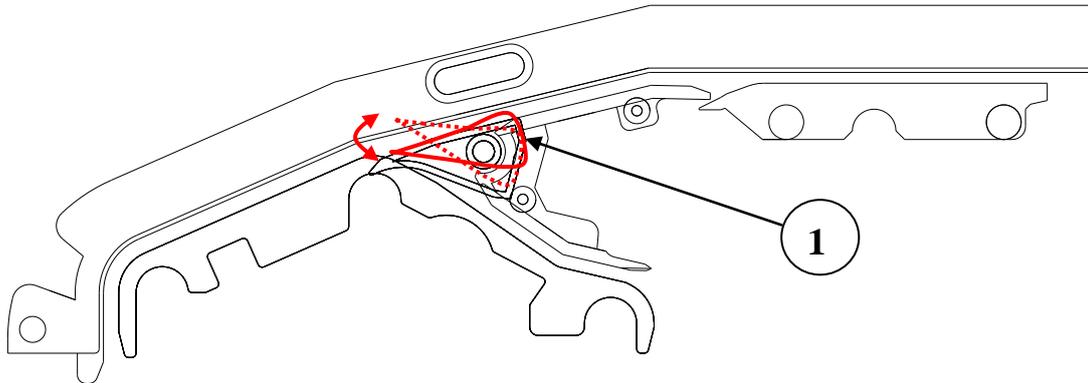

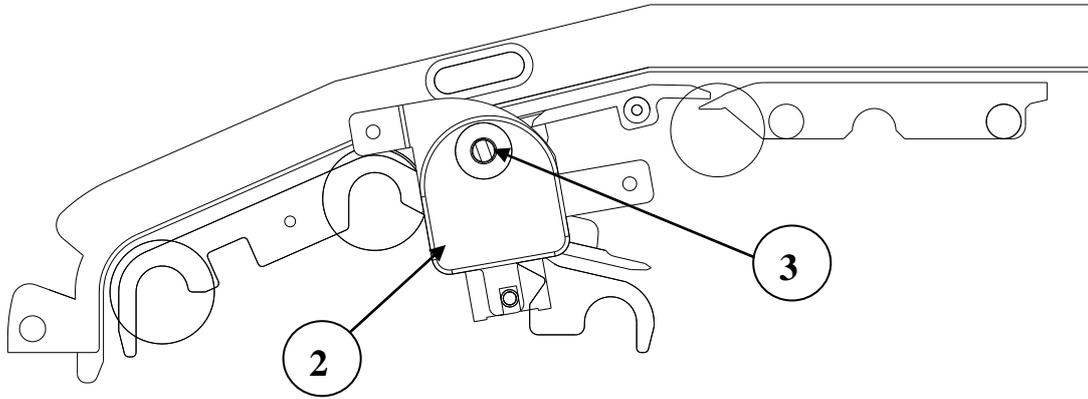

3.1.1 DOUBLE FEEDING DETECTION PART

| NO | PART NO | DESCRIPTION | FUNCTION |
|----|-------------------|-----------------------------------|---|
| 1 | RPA000049C | PWA SONAR EMIT | The mechanism detects whether double note exists or not on path during transfer as ultrasonic sensor transmission measuring the thickness and amplication |
| 2 | RPA000049D | PWA SONAR RCV | |
| 3 | B1604P0399 | GUIDE CASH FEED SONIC VCDM | |
| 4 | B1604P0394 | GUIDE CASH FEED 3 VCDM | |
| 5 | B1108P0654 | BRACKET ULTRASONIC VCDM | |

| | | | | | |
|---|-----------------|-------|----------------|------|---------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 8 of 88 |

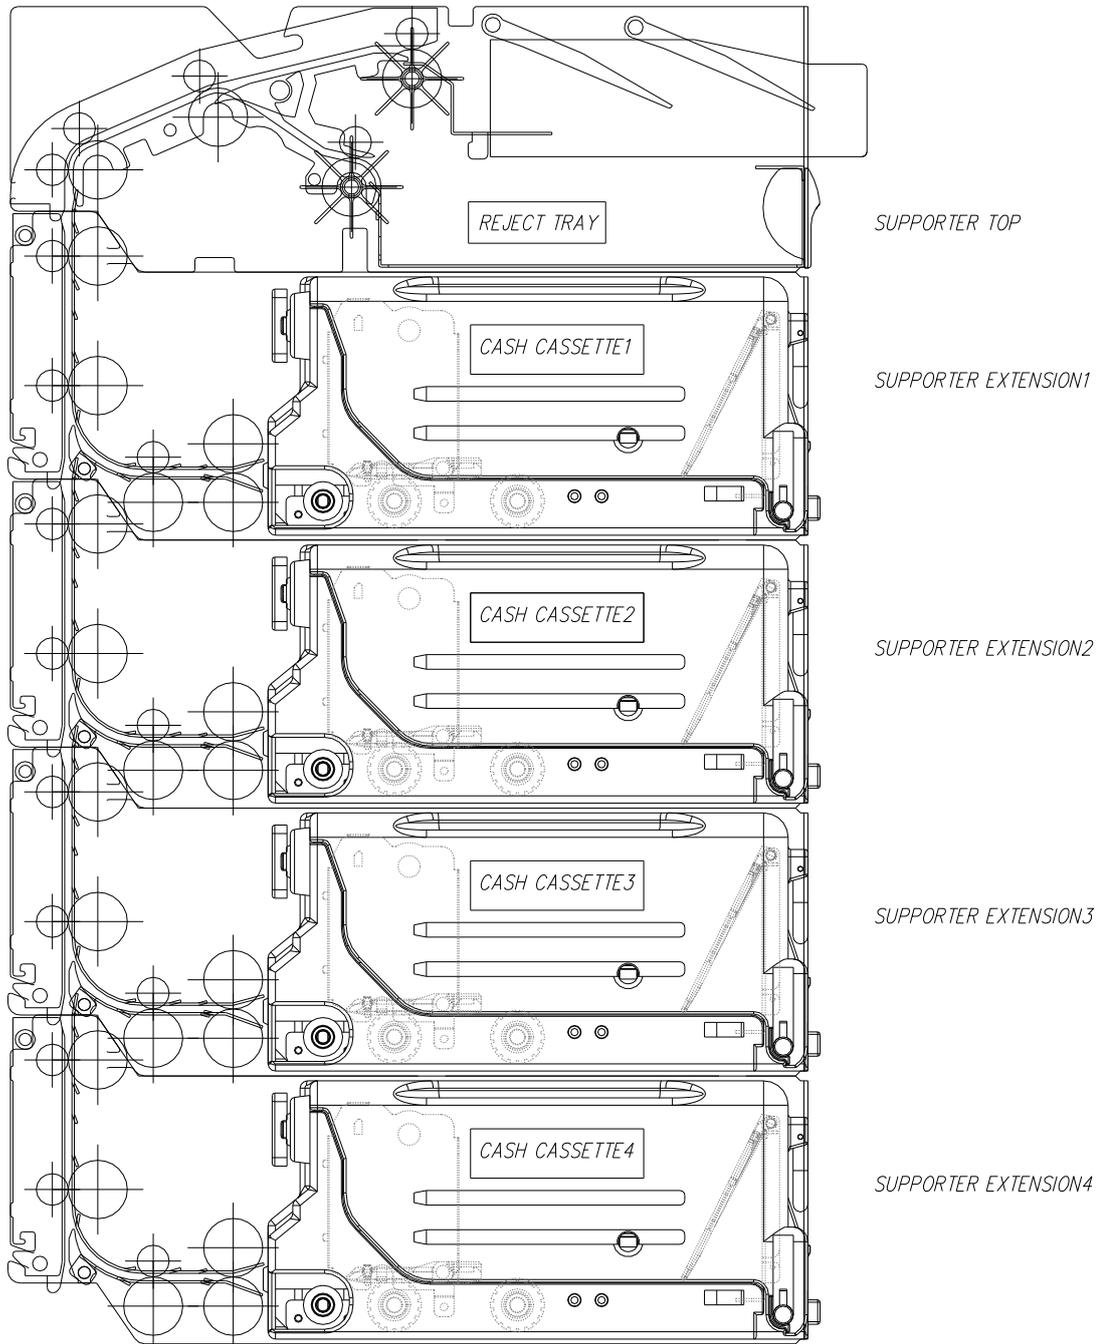

3.1.2 DIVERTING MECHANISM PART

| NO | PART NO | DESCRIPTION | FUNCTION |
|----|------------|---------------------|---|
| 1 | B1604P0397 | GUIDE DIVERTER VCDM | When the damaged or doubled notes should be sent to Reject Tray, the mechanism is activated by Swing Selector in order to divert the notes. |
| 2 | B2806P0025 | SWING SELECTOR | |
| 3 | B2803P0806 | SHAFT DIVERTER VCDM | |

| | | | | | |

3.2.4 CASSETTE GUIDE ADJUSTMENT

Each banknote need to be set to the following combination.

① **Side Guide Adjust Method**

- Side guide adjusted by one screw fastened at each position(1~4).

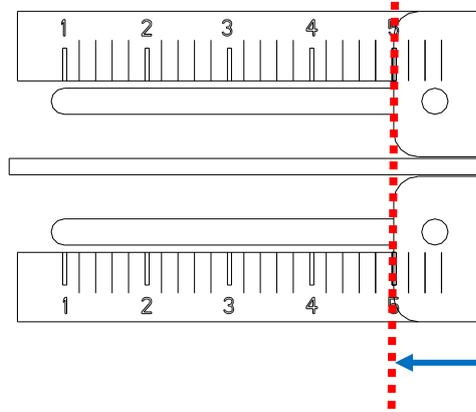

② **Rear Guide Adjust Method**

- Rear guide adjusted by two screws fastened at scaled position.

- Adjusting reference of rear guide is edge position of rear guide. (see below figure)

| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 44 of 88 |

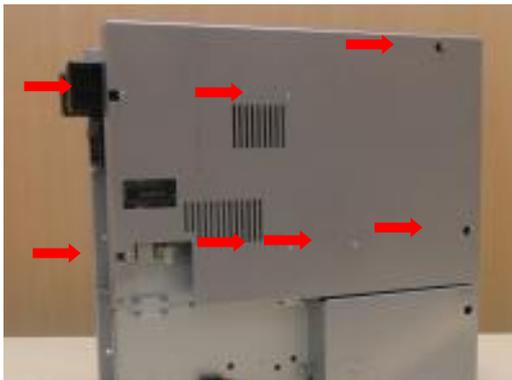

5.1.1 ANTI-STATIC BRUSH

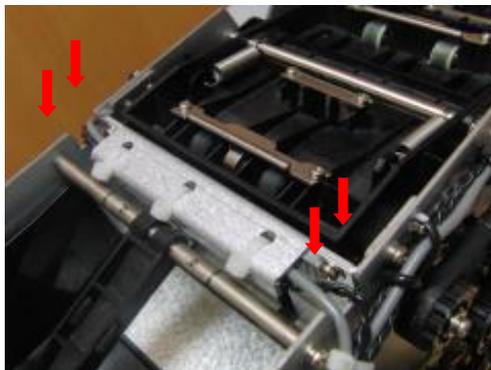

Check if Brush is damaged too much and then try to change it if it is.

[Changing Procedure]

- ① Loosen and remove seven screws on each side of frame according to the picture.

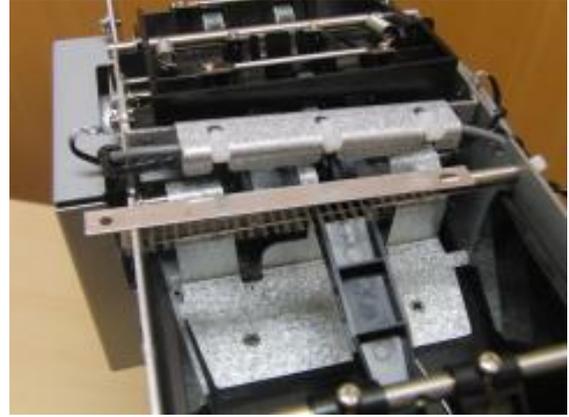

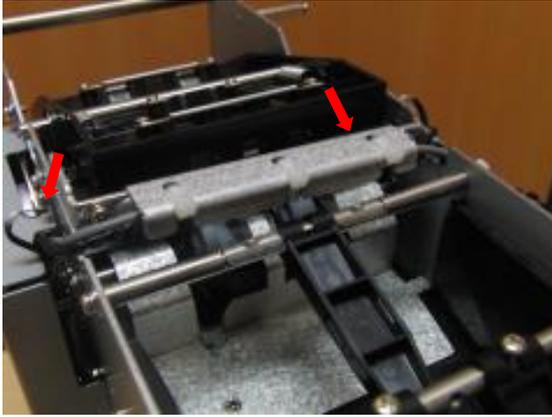

- ② Loosen and remove 4 screws on two side(left/right) of frame according to the picture.

| | | | | | |
|---|-----------------|--------------|----------------|-------------|-------------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 45 of 88 |

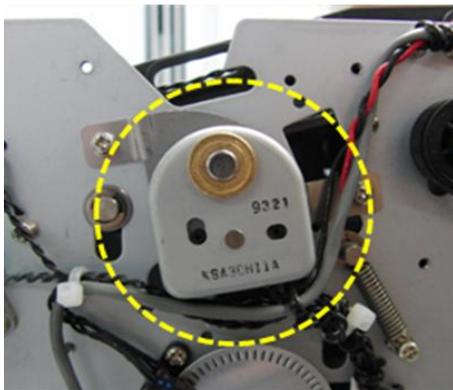

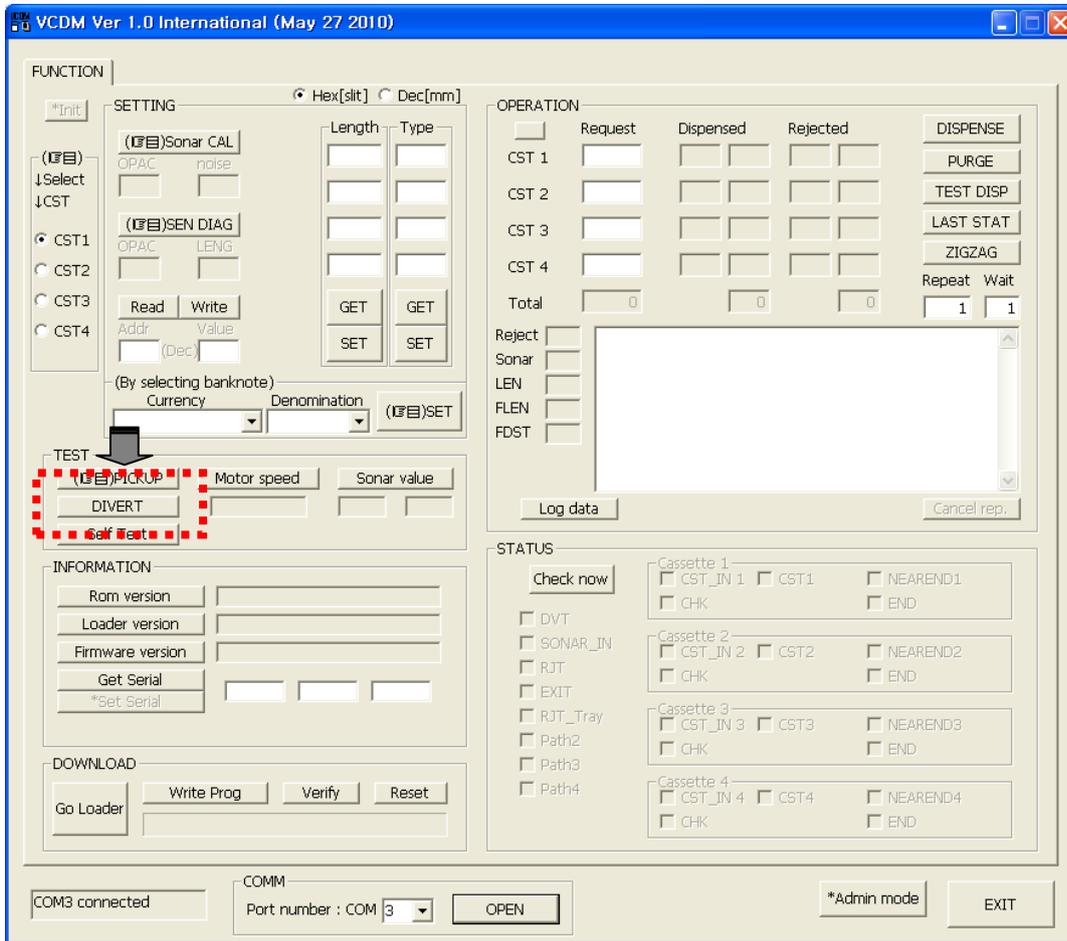

- ③ Loosen and remove 2 screws on brush bracket according to the picture. And replace damaged brush with new one.

- ④ After replacement, assembly is reverse order of disjoining as above described.

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 46 of 88 |

5.1.2 DIVERTING

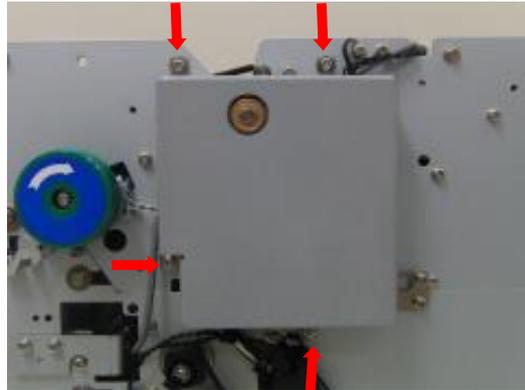

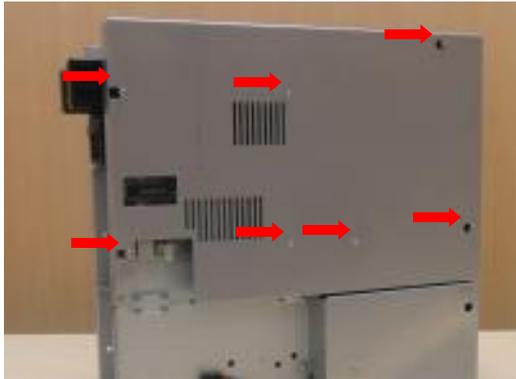

1) TEST TAB → DIVERT Button : Checking operation of SWING SELECTOR.

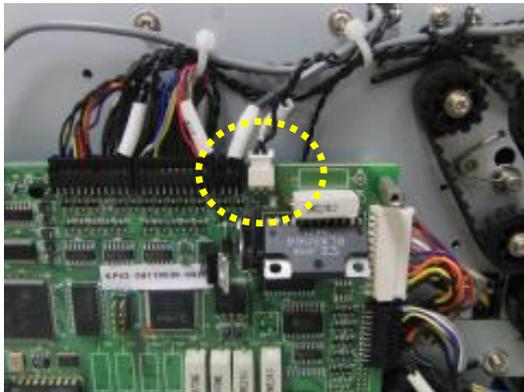

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 47 of 88 |

[Changing Procedure]

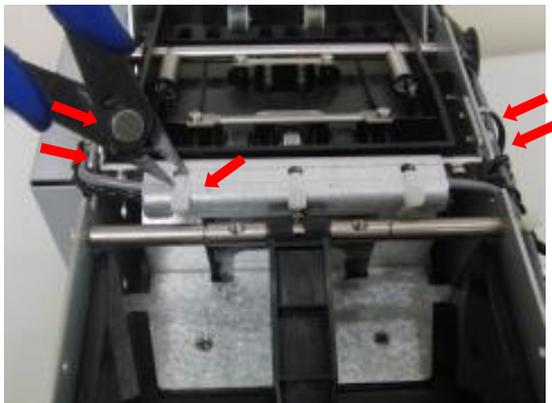

- ① Loosen and remove seven screws on each side of frame according to the picture.
- ② Loosen and remove four screws on each side of frame according to the picture.
And remove the cover

- ③ Unconnect the connection of swing selector.

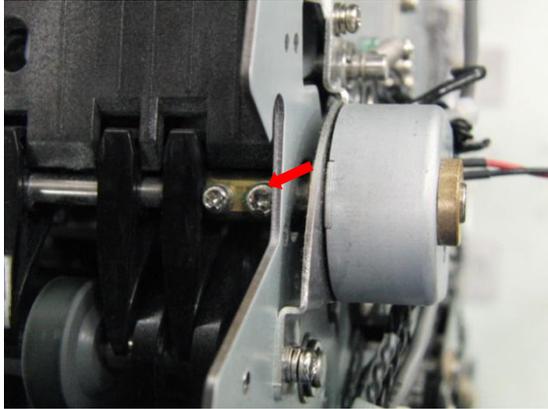

- ④ For removal of bill press guide, loosen and remove four screw on each side of frame according to the picture. And cut three wire clamping with cutter.

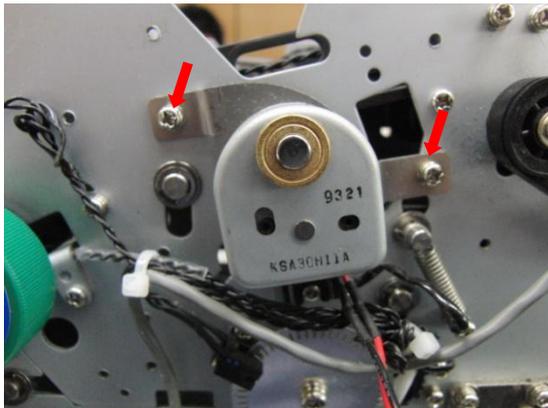

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 48 of 88 |

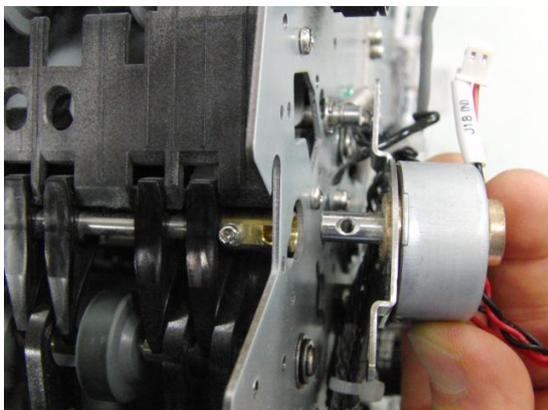

- ⑤ Loosen and remove one screw between diverter shaft and swing selector.
 [Caution] Must be remove screw at the side of swing selector.

- ⑥ Loosen and remove two screw on swing selector bracket according to the picture.

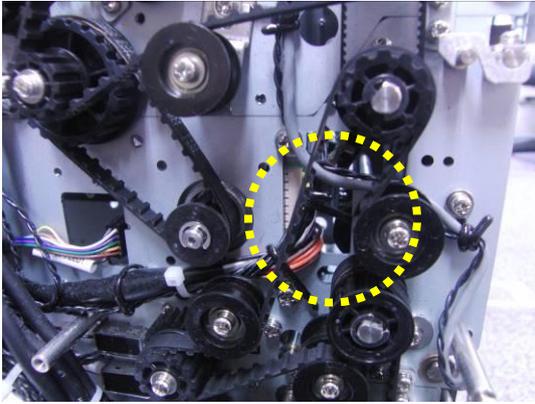

- ⑦ After removal of all screw, replace the swing selector with new one.

- ⑧ After replacement, assembly is reverse order of disjoining as above described.

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 49 of 88 |

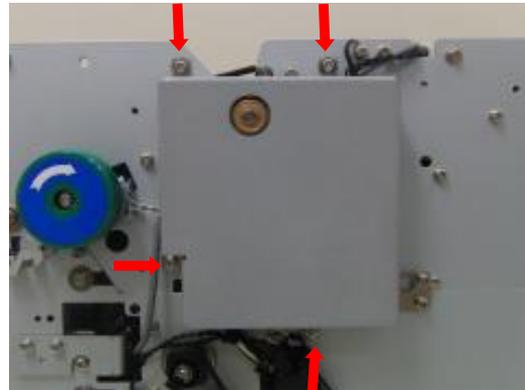

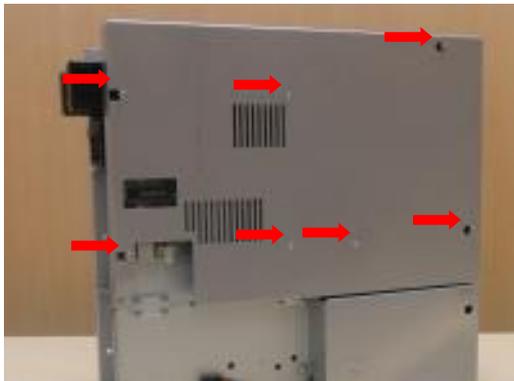

5.1.3 BLDC MOTOR

1) Please remove the cover and check if Motor related cable is okay or have problem like shortage or peel off.

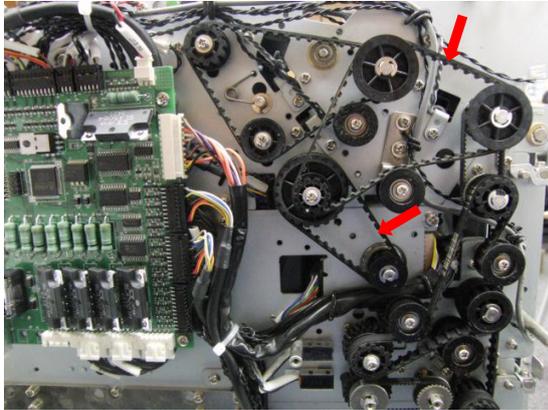

[Changing Procedure]

- ① Loosen and remove seven screws on each side of frame according to the picture.
- ② Loosen and remove four screws on each side of frame according to the picture.
And remove the cover

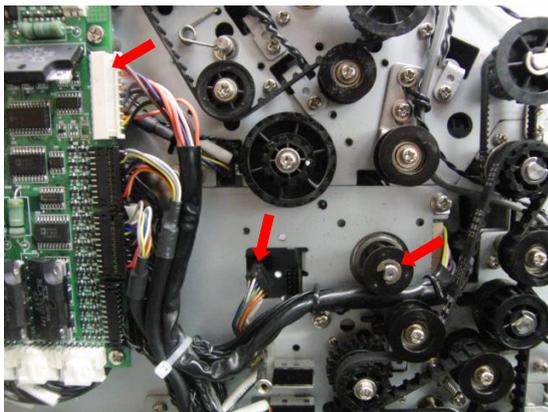

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 50 of 88 |

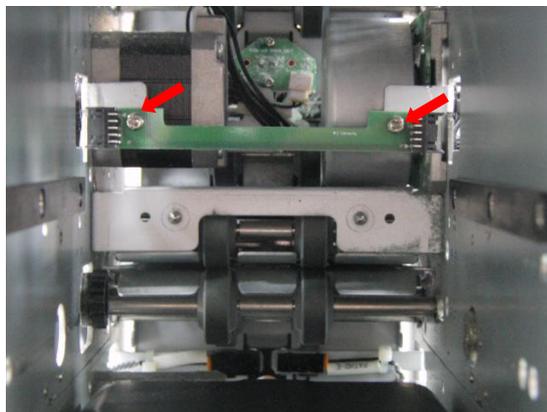

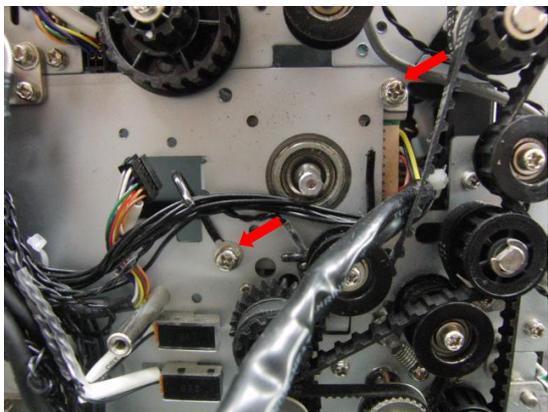

③ Remove the timing belt 1, 2 according to the picture.

④ Disconnect the BLDC connector and sensor connector and remove one E-type ring and remove one pulley at the axis of BLDC motor according to the picture.

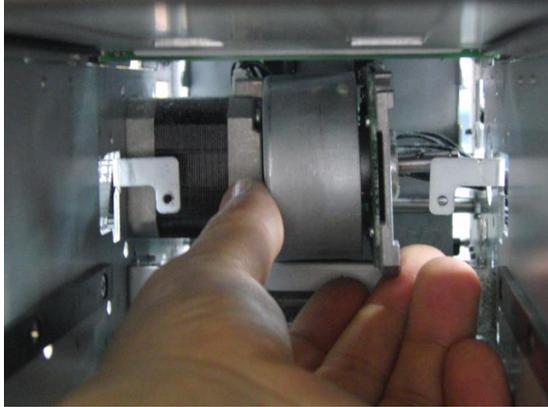

⑤ Loosen and remove two screws on the frame and loosen and remove two screws on bended position of frame, and remove connection PWA according to the picture.

| | | | | | |
|---|-----------------|--------------|----------------|-------------|-------------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 51 of 88 |

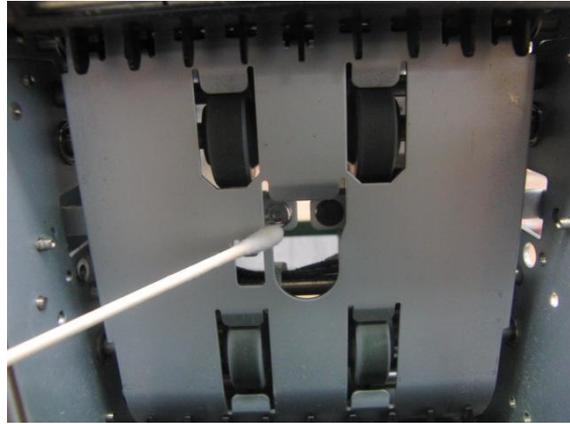

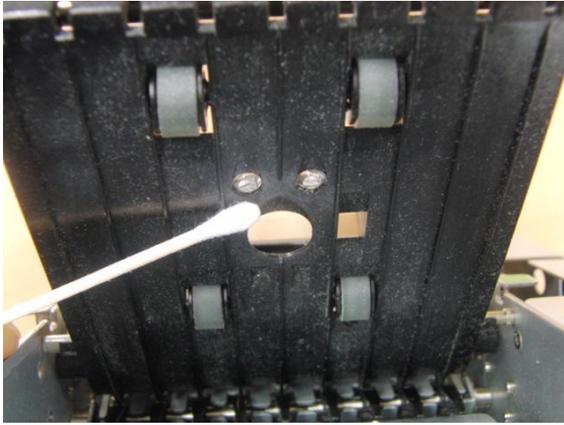

⑥ After removal of all screws and PWA, replace the BLDC motor with new one.

⑦ After replacement, assembly is reverse order of disjoining as above described.

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 52 of 88 |

5.1.4 PATH SENSOR

- 1) GUIDE OPEN → Clean by using of cotton swab the optical sensor and surface and reflected lens of sensor.

[Changing Procedure]

- All Changing Procedure are done with the condition of cover off.

(1) Type 1 – Near-end Sensor, CST_IN Sensor, CST Sensor

- ① Loosen the holder of sensor and remove sensor, and unconnect the connector
- ② After removal of sensor, replace sensor with new one.
- ③ New Sensor assemble with snap fit of the holder easily.

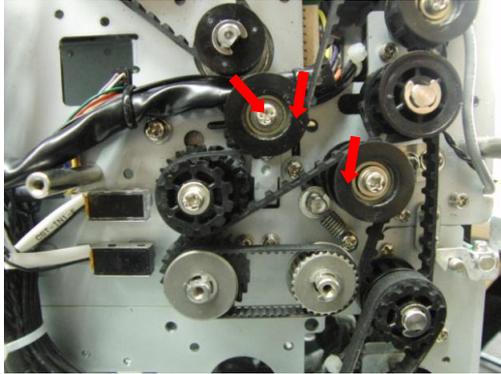

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 53 of 88 |

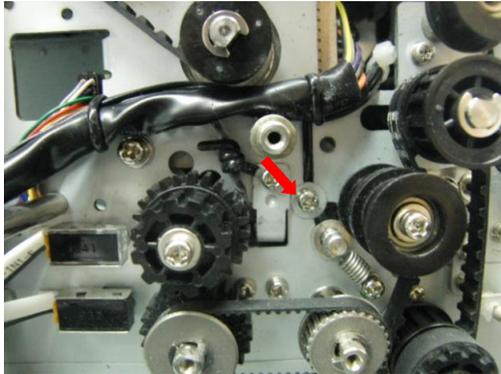

(2) Type 2 – Path Sensors(CHK Sensor, RJT Sensor, Path Sensor)

[CHK Sensor]

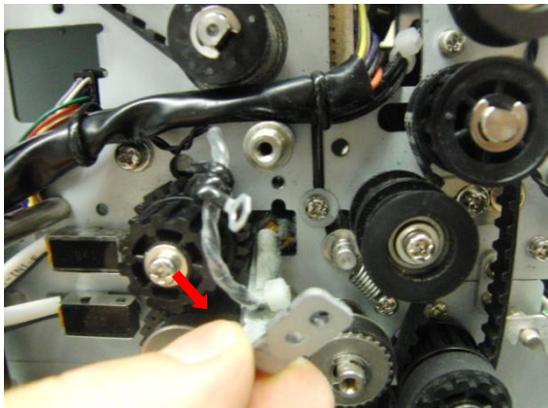

- ① Remove the belt and loosen and remove one screw on the idle roller, and remove idle roller according to the picture.

- ② Loosen and remove one screw on sensor bracket according to the picture.

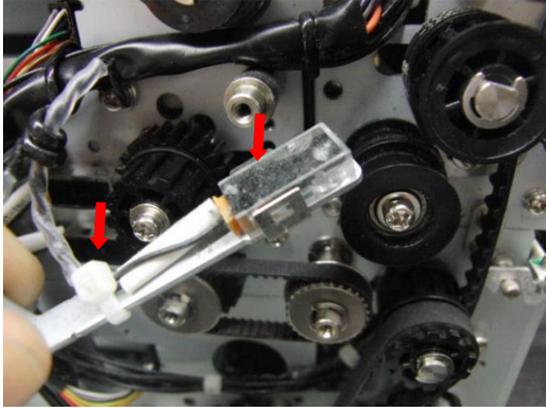

- ③ Pull sensor bracket out of the frame according to the picture.

- ④ Cut wire clamping and unplug the connector on sensor.

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 54 of 88 |

After removal of harness, loosen the holder of sensor. And then, replace sensor with new one.

⑤ After replacement, assembly is reverse order of disjoining as above described.

[Caution]

Avoiding of cut the wire off, don't fasten wire clamping with excessive force.

[RJT/Path Sensor]

→ Changing procedure is similar to CHK Sensor replacement as above described procedure.

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 55 of 88 |

(3) Type 3 – Div Sensor

- ① Loosen and remove one screw on the knob according to the picture.

- ② Loosen and remove one screw on the sensor bracket according to the picture.

- ③ Pull sensor bracket out of the frame according to the picture.

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 56 of 88 |

- ④ Cut wire clamping and unplug the connector on sensor PWA.
After removal of harness, loosen and remove two screw on PWA. And then, change sensor PWA with new one.

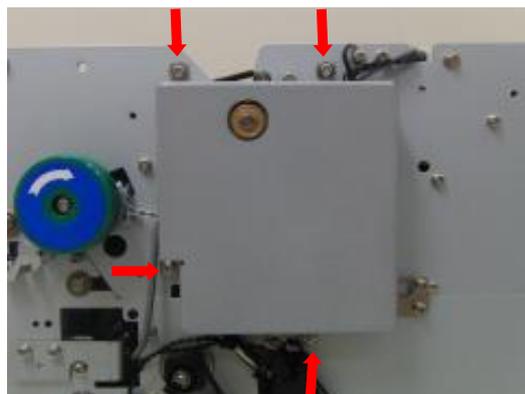

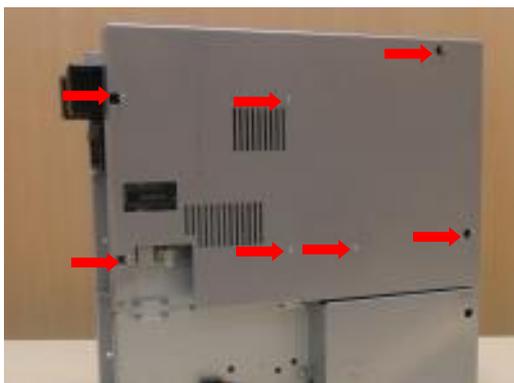

- ⑤ After replacement, assemble with the reverse method of above described procedure.

[Caution]

Avoiding of cut the wire off, don't fasten wire clamping with excessive force.

(4) Type 4 – Exit Sensor

- ① Loosen and remove seven screws on each side of frame according to the picture.
- ② Loosen and remove four screws on each side of frame according to the picture.
And remove the cover

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 57 of 88 |

③ Loosen and remove 2 screws on two side(left/right) of frame according to the picture.

④ Pull sensor bracket out of the frame according to the picture.

⑤ Cut wire clamping and unplug the connector on sensor.

After removal of harness, loosen the holder of sensor. And then, replace sensor with new one.

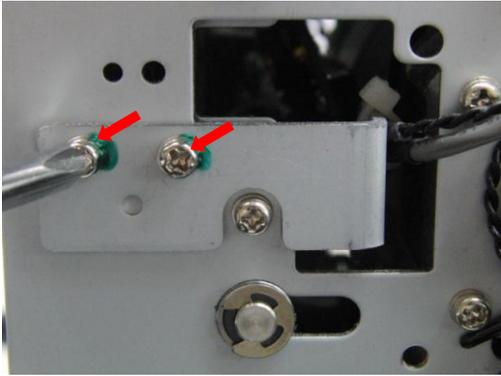

⑥ After replacement, assembly is reverse order of disjoining as above described

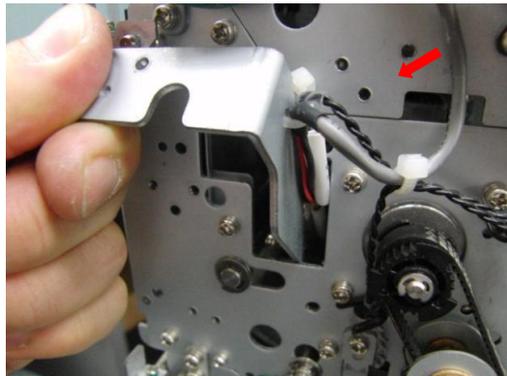

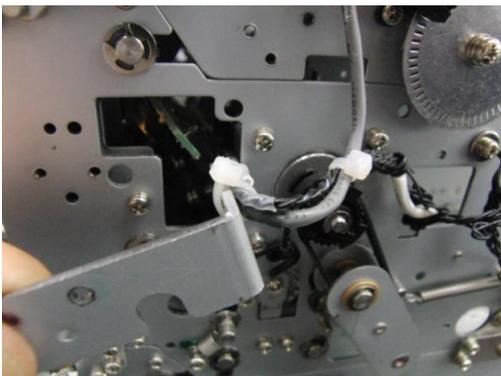

| | | | | | |
|---|-----------------|-------|----------------|------|----------|
|  | DOC NO | MODEL | NAME | REV. | PAGE |
| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 58 of 88 |

(5) Type 5 – Sonar Sensor – Emit Part

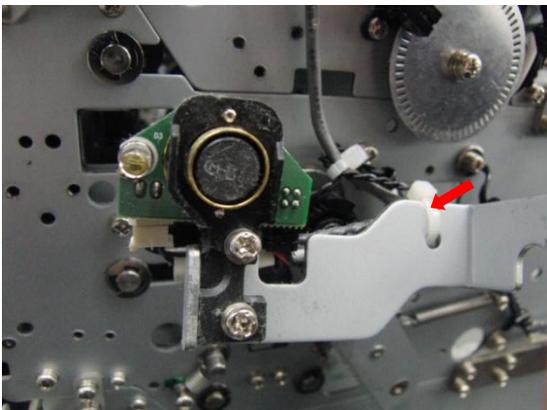

- ① Loosen and remove two screws on the sensor bracket according to the picture.

- ② After removal of screw, pull sensor bracket out of the frame, and then cut wire clamping according to the picture.

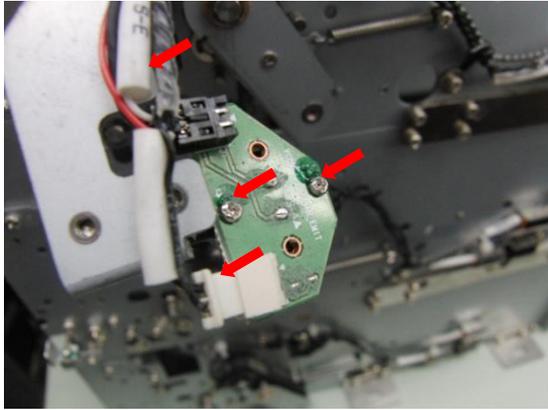

- ③ After pull out of bracket, cut wire clamping according to the picture.

| | PL-VCDM0000-004 | VCDM | Service Manual | 1.1 | 59 of 88 |

- ④ Unplug connector on sensor PWA, loosen and remove two screws on the PWA. After removal of sensor PWA, replace sensor PWA with new one.

- ⑤ After replacement, assembly is reverse order of disjoining as above described.

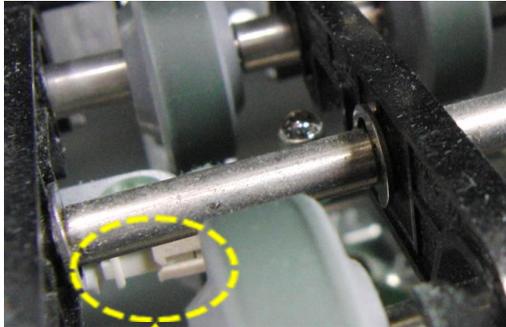

(6) Type 6 – Sonar Sensor – Receiver Part

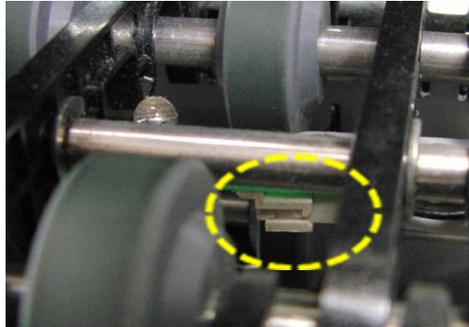

- ① Unplug connector on sensor PWA, loosen and remove two screws on the PWA. After removal of sensor PWA, replace sensor PWA with new one.
- ② After replacement, assembly is reverse order of disjoining as above described.

5.1.6 NEAREND(LOW-NOTE) SENSOR

- 1) Pull Cash Cassette out and clean NEAREND SENSOR by cotton swab
- 2) Clean the NEAREND SENSORS on both sides.

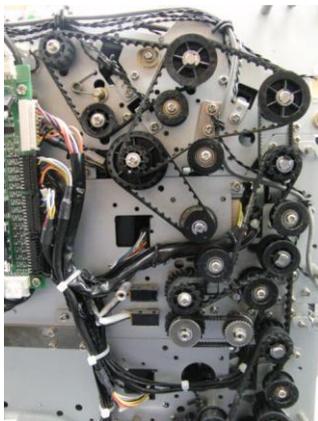

5.1.7 TIMMING BELT

- 1) Please remove the cover and check if the noise of belt.
- 2) If the crack or separation of belt, replace belt with new one.

[Changing Procedure]

- All Changing Procedure are done with the condition of cover off.
- Belt configuration(see 3.5 Timming Belt Configuration) is shown as two level of height with the position of pulley.

- (1) Type 1 – Low level belt (close to frame)
- (2) Type 2 – High level belt (close to cover)

- ① For the case of type 2 belts, belt is easily changed.
- ② For the case of type 1 belts, remove the type 2 belt and pulley at same position before

6 TROUBLE SHOOTING – ERROR CODES

The trouble shooting process of VCDM for each trouble is like the below.

6.1 ERROR CODE LIST

| CODE | Description |
|-------------|---|
| 0x01 | Feeding Time-out between CHECK Sensor and SONAR Sensor |
| 0x02 | Feeding Time-out between SONAR Sensor and DIVERT Sensor |
| 0x03 | Feeding Time-out between DIVERT Sensor and EXIT Sensor |
| 0x04 | Feeding Time-out between DIVERT Sensor and REJECT Sensor |
| 0x05 | A Note Is Staying at EXT Sensor |
| 0x06 | Ejecting the Note Suspected as Rejected |
| 0x07 | Abnormal Note Management (Flow Processing Error) |
| 0x08 | Abnormal Note Management (Flow Processing Error) |
| 0x09 | Rejecting the Note Suspected as Ejected |
| 0x0B | Detecting Notes on the Path Before Start of Pick-up |
| 0x0C | Too Many Pick-up Events During Dispensing from One Cash Cassette (Limits of Total Pickup : 50 Notes Including all the Rejected) |
| 0x0D | Too Many Rejects During Dispensing from One Cash Cassette (Limit: 20 notes) |
| 0x0E | Abnormal Termination During Purge Execution |
| 0x0F | A Note Is Staying at REJECT Sensor |
| 0x11 | Detecting Trouble in Motor or Slit Sensor Before Dispensing |
| 0x12 | Not Detecting Reject Tray before Start or for Operation |
| 0x13 | Failed to Calibrate Sensors |
| 0x14 | More Banknotes than the Requested are Dispensed. |
| 0x15 | Dispensing is Not Terminated within 90 Seconds. |
| 0x16 | Recognizing Abnormal Command |
| 0x17 | Recognizing Abnormal Parameters on the Command |
| 0x18 | Download Sequence is incorrect. |
| 0x19 | Failure of Write |
| 0x1A | Not to Give Verify command on Reset after Downloading Program |
| 0x1B | Failure of Writing EEPROM |
| 0x1C | Mismatches Checksum of EEPROM on Writing EEPROM |
| 0x1D | Error in Dispense Serial Number or Identification Number of Dispense Command (in case of the same value of Serial) |
| 0x1E | ACK message was not return from host after dispenser transmit response. |
| 0x1F | Detect Notes in Exit Sensor at Purge |
| 0x20 | Divert Sensor is Always On |
| 0x21 | Exit Sensor is Always On. |
| 0x22 | Reject Sensor is Always On. |
